ACR Firefly®

Firefly®₃
Manually Activated Rescue Strobe
The Firefly₃ is the state-of-the-art heir to its famous forerunners, the Firefly4F and 4G. Using a high-intensity omni-directional Xenon 360° strobe, it cuts through the foulest conditions with a state-of-the-art lamp/lens combo that creates a super-bright flash visible from beyond 1 nm (1.9 km). The Firefly₃ surpasses SOLAS specifications.

Firefly®₃Waterbug™
Water-Activated Rescue Strobe
With its special water-activation feature, this powerful rescue strobe automatically turns on when armed and in contact with water. Like the standard Firefly₃ model, the Waterbug™ delivers 250,000 peak lumens in a 360° beam, offering maximum rescue visibility. Visible from beyond 1 nm (1.9 km).

Firefly®₂ Doublefly™
Rescue Combo Light, Strobe
The Doublefly's multi-function switch allows you to select between a high-intensity strobe visible from beyond 1 nm (1.9 km), or steady, incandescent light for close-up recovery work. The Xenon 360° beam flashes at one second intervals for at least 8 hours (2 hours continuous operation in incandescent mode).
