Elite-5 HDI SERIES

Introducing our **NEW**, affordable, easy-to-use Elite-5 HDI series.

Find, Naviate, Dominate with the new, affordable Elite-5 Hybrid Dual Imaging™ (HDI) series. Replacing the previous Elite-5 and Elite-5 DSI series of products, all Elite-5 HDI models feature Hybrid Dual Imaging™, which combines two award-winning technologies — Broadband Sounder™ and Downscan Imaging™ — to provide the best possible view of the water column and everything in it.

FIND.

Broadband Sounder™

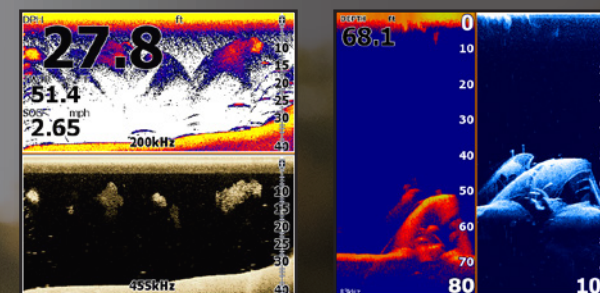

Built-in to the new Lowrance HDI Skimmer® transducer design, Broadband Sounder™ technology is ideal for marking fish arches and tracking lure action.

DownScan Imaging™

Delivers easy-to-understand, picture-like views of structure and bottom detail.

Advanced Signal Processing™

On fishfinder models, automatically see fish, structure and bottom detail more clearly thanks to Lowrance's exclusive Advanced Signal Processing (ASP) that reduces the need to manually adjust settings.

Split-screen views of Broadband Sounder™ and DownScan Imaging™

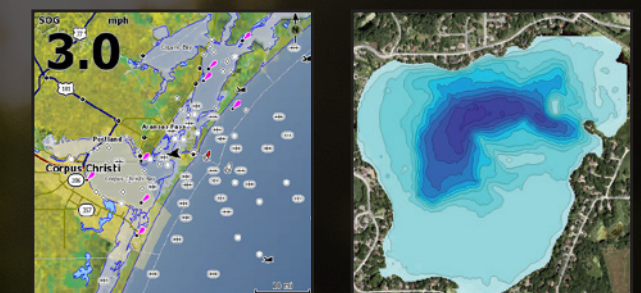

NAVIGATE.

Reliable Navigation That's Easy To Use

Highly accurate, built-in GPS antenna plus a detailed U.S. map with more than 3,000 lakes and rivers, as well as coastal contours to 1,000 ft. A micro SD card can also be used to display Lake Insight™ and Nautic Insight™ HD and PRO cartography, as well as Navionics® Gold, HotMaps® Premium, Fishing Hotspots® PRO and Jeppesen C-Map Max-N Wide charts.

Create your own map from real sonar data that you record with Insight Genesis™

Allows users to upload recorded sonar logs to our online map creation service to make their own custom, high-resolution contour, bottom hardness and vegetation maps.

Detailed U.S. map, plus a wide choice of map-upgrade options

Create highly detailed custom maps from actual sonar logs with Insight Genesis™

DOMINATE.

Elite-5 Color Display

Lowrance-exclusive, high-resolution, 5-inch, color display provides brilliant visibility and viewing detail in all conditions.

Trackback™ Feature

Easily scrollback through sonar history to review and zoom-in for a closer look at bottom structure, baitfish and game fish. Save a waypoint on chartplotter models to quickly find that location again, eliminating the need to circle back and retrace a path.

All-New, Page Selector

An easier-to-use menu system with quick access to all features using one-thumb operation.

DownScan Imaging™ Overlay

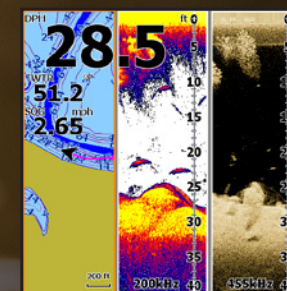

Exclusive technology overlays DownScan Imaging™ onto Broadband Sounder™ display for one stunning view that separates and clearly exposes fish targets from surrounding structure. Overlay transparency and color palettes are fully adjustable.

Multi-Window Displays

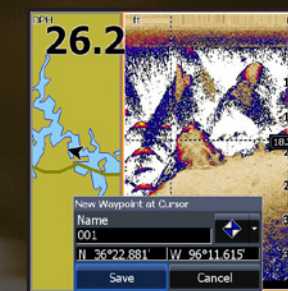

Choose from as many as eight preset page layouts, including up to three panels in split-screen mode to view chart, Broadband Sounder™ and DownScan Imaging™ -- all on one screen simultaneously. The Multi-Window feature can be accessed while viewing live sonar and charting.

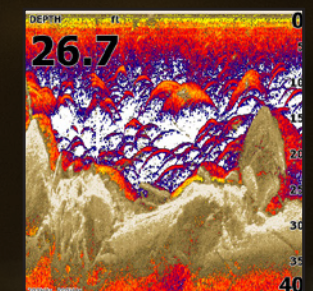

Page Selector Bar while viewing sonar or chart

Tri-screen display of chart and Hybrid Dual Imaging™

Scroll thru sonar history and save a waypoint with TrackBack™ feature

Industry Exclusive! Downscan™ Imaging overlaid on Broadband Sounder™ Image

Elite-5 HDI SERIES

- Brilliant 5-inch Full VGA SolarMAX™ PLUS, 480x480 Color Display
- 6.9"W x 5.4"H x 2.5"D-IPX7-Waterproof Casing
- DownScan Imaging Depth Capability: 300 ft
- Broadband Sounder Depth Capability: 1000 ft with 83/200 kHz; 2500 ft with 50/200 kHz

ELITE-5 HDI Fishfinder/Chartplotter

*Gold models feature enhanced Navionics chart detail for U.S./Canada/Alaska and Bahamas coastal areas, plus Great Lakes and major Canadian lakes.
