LED RUN VEST™

Streamlined and featherweight, our LED Run Vest is designed to keep you safe, seen, and light on your feet on those early morning/late-night runs.

We designed the LED Running Vest with serious runners in mind. Available in two sizes (S/M and L/XL), it's a sleek, comfortable, and functional way to be seen and safe on low-visibility, early morning, and late night runs. Made of lightweight, water–resistant mesh, its two illuminated flexible polymer strips (front & back) can each be set to one of two bright LED modes (steady glow or flash), and the sides are trimmed with 360° passively reflective safety accents. The power/mode buttons are easily accessible on the front and back of the vest, and easily adjustable straps at the waist can be cinched for a precise fit. Two zip closure pockets in the back are individually sized to hold everything you need for your run, with one of the back pockets featuring a weather-resistant design to keep your cell phone or other valuables safe if you get caught out in the rain. There's even a handy key clip for your home or car key.

⊕ The LED Run Vest is a comfortable, lightweight safety vest that features both bright, active LED illumination as well as passively reflective safety accents
