

CARBON FIBER CENTER RIGGER POLE

Taco Sport Fishing introduces their first ever Carbon Fiber Center Rigger Pole for the ultimate offshore fishing experience. Our "Patent Pending" innovative design was built to meet the demands of today's modern fishing techniques and for those who need to get the most out of their high performance fishing boats on the market.

Our Carbon Fiber Center Rigger Pole is by far stronger and lighter than any other aluminum pole on the market today. The cylindrical design has the strength built into it to allow for today's modern fishing techniques of pulling dredges of ballyhoo, mullet or squids through the water at higher speeds that would be difficult to achieve with aluminum poles.

FEATURES & BENEFITS

- UV-resistant, clear coated Black Carbon Fiber pole construction
- Stainless Steel Type 316 collars and rings
- Single Brass rollers allow for easy line rigging
- Patent pending swivel roller design mechanism allows for a more natural swimming action which will result in hooking up more fish
- 10' pole telescopes to less than 7' for bridge clearance, trailering and storage
- 16' pole telescopes to less than 8' for bridge clearance, trailering and storage
- Designed for use with universal or Taco Sport Fishing mounts that accept 1-1/8" outriggers (10') or 1-1/2" outriggers (16')
- Single line Center Rigger ideal for boats up to 40'
- Includes a nylon mesh carry bag to protect pole
- Sold as Each

INCLUDES NYLON MESH BAG & LINE CADDY
