

NMEA 2000 WATERPROOF WIRED REMOTE

MS-NRX300 FUSION-LINK NMEA 2000 WIRED REMOTE CONTROL

REPEAT NMEA 2000 DATA ON SCREEN WHEN CONNECTED TO AN EXISTING NMEA 2000 NETWORK.

DATA SUCH AS WIND DIRECTION, WATER TEMPERATURE AND MORE ARE DISPLAYED FOR QUICK ACCESS TO IMPORTANT DATA.

KEY FEATURES

MULTI-ZONE TECHNOLOGY

Install the MS-NRX300 wired remote anywhere onboard the vessel, in the flybridge, cockpit, saloon or cabin for example and gain full localized control of one or up to four individual audio zones.

NMEA 2000 CERTIFIED

Certified for connection to any NMEA 2000 network making installation straight forward, saving time and money. Once connected, the wired remote will double as a NMEA 2000 repeater, displaying supported NMEA data on screen.

COMPLIES WITH IPx7 WATERPROOF STANDARDS

Perfect for installation on a swim platform or deck, the MS-NRX300 wired remote control is designed for the marine environment.

TRUE-MARINE DESIGN AND WARRANTY

Designed specifically for the marine environment, featuring a 3 year warranty.

SPECIFICATIONS

- NMEA 2000 Certified LEN: 3
- Large 2.6" Monochrome optically bonded LCD
- High contrast daylight viewable in direct sunlight
- Adjustable backlit LCD
- Dash or Flush mount installation options
- Local zone control or all zone control (up to 4 zones)
- Complies with IPx7 waterproof standards
- STM32 Micro Processor
