

## INSTRUCTIONS

**Secure® Chafe Guards** protect your lines from wear. Model #395 is removable and adjustable. Velcro® brand hook fasteners on the entire inside of the guard grip the line securely; no need for additional strings or ties. The outside cover is made of marine-tough nylon for resistance to chafe over years of use. Also protects your boat's finish. Sold in pairs.

Note: Model #394, Secure Permanent Chafe Guards, were discontinued in 2005. Instructions for their use appear at the end of this document.

Chafe protection is critical at the dock, at anchor or on a mooring. Davis offers the perfect solution to prevent chafing over a cleat, cap rail, where two lines cross or at the anchor roller. Great for anchor lines or mooring pennants, where chafing through a line could cost you the boat. Dock lines can be expensive; extending their life with good chafe protection is not.

#395 Secure® Removable  
Chafe Guards, pair

*On a dock cleat*

*Over the cap rail*

*Where two lines cross*

*At the anchor roller*

## DIRECTIONS

Secure® Removable Chafe Guards offer flexibility. They can be installed anywhere along lines from 3/8 to 7/8" (10 to 24 mm) and some 1" line as well.

1. If possible, lay line and chafe guard on a flat surface.
2. Start at the edge where BOTH Velcro fasteners are sewn onto the chafe guard. Begin rolling the line and chafe guard together until chafe guard is snugly rolled up.
3. Interlock the Velcro strips securely. Face the seam away from any bend where the line turns around a cleat or roller.

To move or adjust position on the line, simply remove the chafe guard and roll onto new location.

### FRENCH

#### Protection amovible antiusure Secure®

1 Si possible, poser la ligne et la protection sur une surface plate. La protection antiusure Secure® convient à des lignes de 9,5 à 22,5 mm.

2 Commencer au bord où les deux bandes de Velcro® sont cousues, en roulant ensemble fermement la ligne et la protection.

3 Fermer le Velcro®. Placer la couture à l'écart de tout coude où la ligne tourne autour d'un taquet ou d'un enrouleur.

### GERMAN

#### Secure® abnehmbarer Scheuerschutz

1. Wenn möglich, Leine und Schutz auf eine flache Oberfläche legen. Secure® Scheuerschutz paßt auf Leinen mit einem Durchmesser von 9,5 bis 22,5mm.

2. An der Kante anfangen, wo beide Velcro® Streifen zusammengeheftet sind, und Leine und Schutz straff zusammenrollen.

3. Die Velcro® Streifen zusammenheften. Die Naht von allen Biegungen wegrichten, an denen die Leine um eine Lippklampe oder eine Seilrolle geht.

### ITALIAN

#### Guaina antiattrito asportabile Secure®

1. Se possibile, posare il cavo e la guaina su una superficie piana. La Guaina antiattrito Secure® si adatta a cavi da 9,5 - 22,5 mm.

2. Iniziando dal bordo dove sono cucite entrambe le fascette in Velcro®, avvolgere strettamente il cavo e la guaina.

3. Unire le fascette in Velcro®. Se il cavo curva intorno ad un cuneo o rullo, posare il cavo con la giuntura rivolta verso l'esterno della curvatura.

### SPANISH

#### Protector antirroce Secure® desmontable

1 De ser posible, tender la cuerda y el protector sobre una superficie plana. El protector antirroce Secure® es compatible con cuerdas de 9,5 a 22,5 mm.

2 Empezar desde el borde donde las dos tiras de Velcro® están cosidas, enrollar la cuerda y el protector juntos bien apretados.

3 Entrelazar las tiras de Velcro®. Dejar la unión lejos de cualquier codo o dobléz donde la cuerda da la vuelta alrededor de la cornamusa o rodillo.
