## Device configuration

The device configuration dialog appears when you start up the unit for the first time. It will reappear at the next restart if you select **Maybe later**. Tap **Close** to manually configure settings.

## Selecting main icons

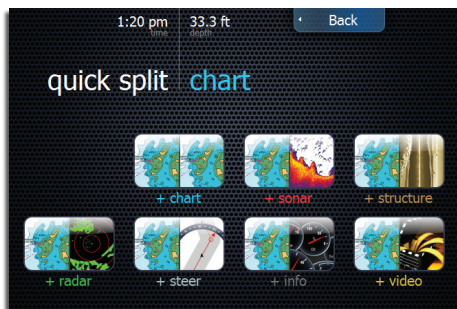

Tap the page icon

## Accessing quick splitscreen displays (quick splits)

Press and hold the page icon

## Customizing favorite pages

Several panel configurations are available:

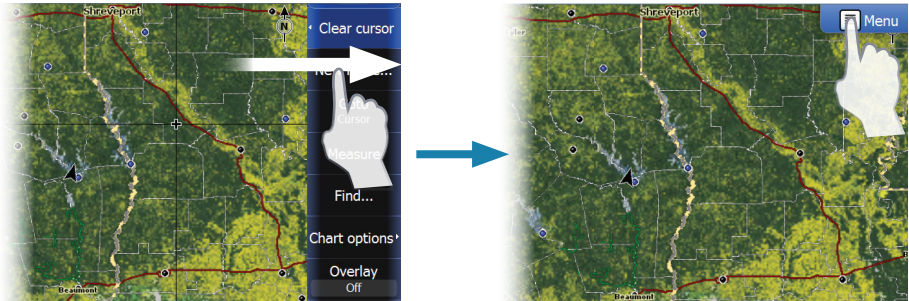

# Menus

## Page menu

### Hiding the page menu

*To hide the menu, drag it to the right*

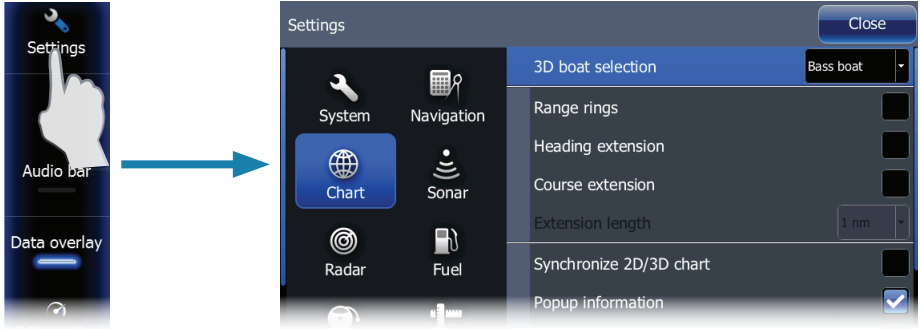

*Restoring the page menu*

### Hidden system menu

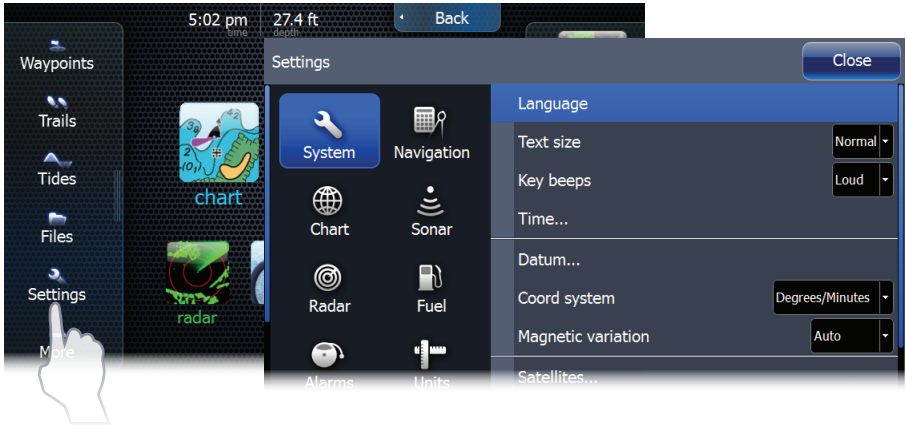

The page menu for each operation mode has a hidden system menu. To access the hidden system menu, place your finger on the top menu item and drag down.

## Operation mode settings menu

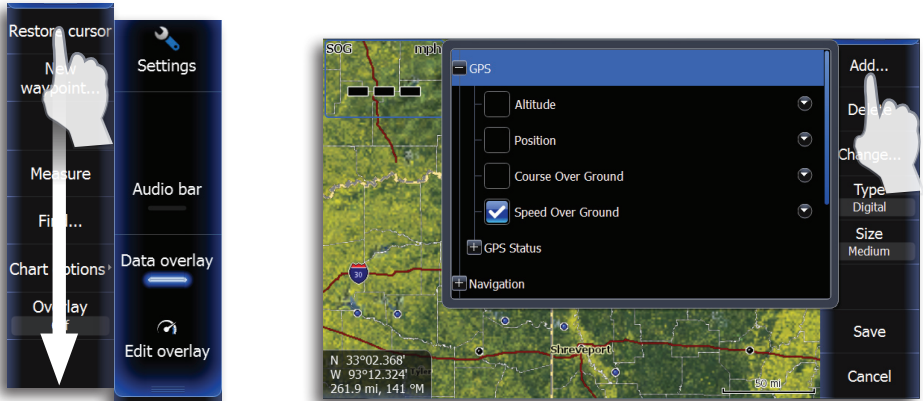

## System settings

## Data Overlay

You can turn on/off viewing of overlay data and edit overlay data from the hidden system menu on any page.

## Saving a Man Overboard waypoint

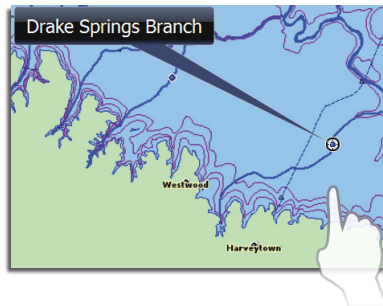

## Using the cursor

Tap the screen to activate the cursor. Drag your finger in any direction to pan the screen. Tap **Clear Cursor** to remove the cursor from the page.

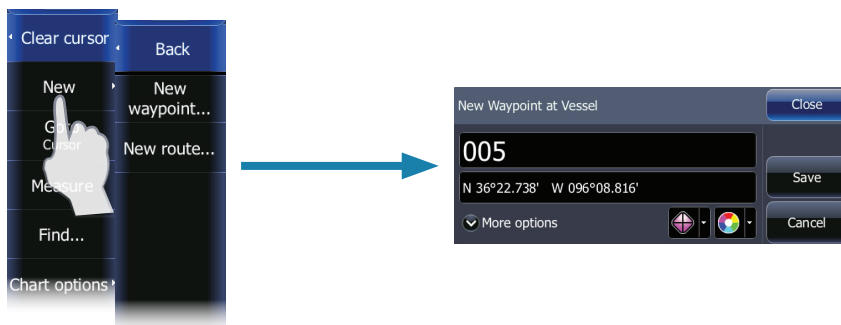

## Cursor assist mode

Press and hold your finger on the screen to switch the cursor to cursor assist mode. The selection tool will appear above your finger. Drag the selection tool over the desired item.

## Creating a waypoint

The waypoint will be positioned at the cursor when the cursor is active. When the cursor is not active, the waypoint will be positioned at your current location.

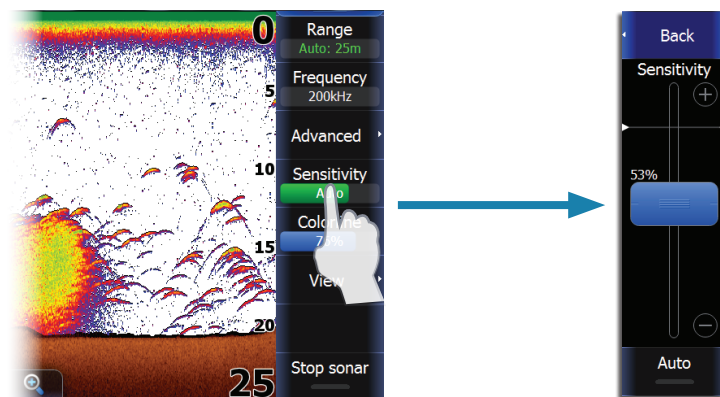

→ **Note:** Press the dedicated waypoint key twice to quickly save a waypoint.

## Sonar

### Adjusting sonar settings

Sensitivity and Colorline are adjusted by dragging the slide bar vertically.

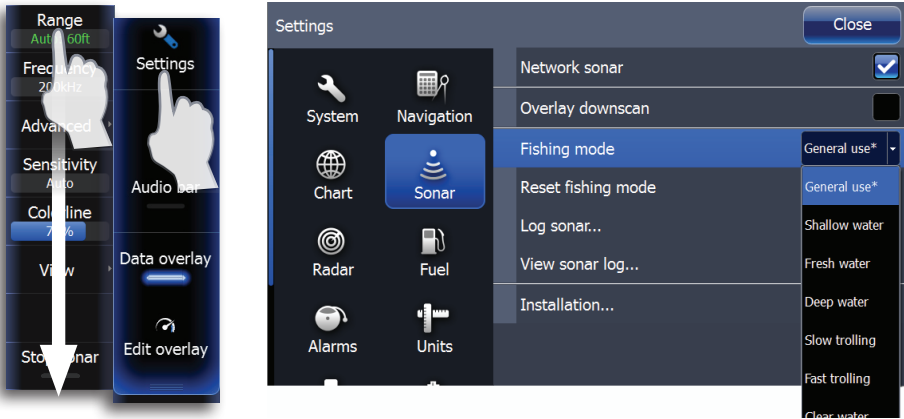

The slide bar is accessed by tapping **Sensitivity** or **Colorline** on the Sonar menu.

## Fishing modes

Consists of preset packages of sonar settings designed for specific fishing conditions.

Use fresh water fishing mode when fishing in less than 60 feet of water.

## Viewing sonar history

You can view sonar history by activating the cursor and then dragging your finger horizontally across the screen.
