## Big Jon's Track System

Big Jon's new Track System has been designed for the boat owner, who wants a convenient way to customize their boat. This Track System will accept Big Jon's downriggers and rod holders that have the "Slim-Line" bases. You can also order the protective End Caps to protect your fishing lines from chaffing on the tracks end edges.

## Big Jon's Universal Gimbal Mounts

Big Jon Sports® now has seven universal gimbal mounting bases that will accept any downrigger on the market. The universal gimbal mounts fit into the flush mount rod holders on your boat. They come in a variety of angles (some have the mounting plate offset to match the angle of the boat's gunwale).

All mounting plates and gimbal mounting bases are precision machined from 6061 T6 aluminum and given a protective anodized finish. The mounting plates are 1/2" x 5" x 6" and the gimbal tubes are 11 1/2" long x 1 1/2" outside diameter (1/8" wall thickness).

90° Universal Gimbal Mount (Bright Anodized) (No Offset).....	UGM90
