

Tired of slow Wi-Fi at the dock? Don't want to deal with satellite domes that don't fit your budget? With the availability of unlimited data plans by various cellular service providers, the Shakespeare Stream™ wireless booster may be the right connectivity solution for you. The Shakespeare Stream brings you reliable cellular internet at the dock, at anchor and underway so you can now truly say BYE-BYE to Slow-Fi.

See how Shakespeare Stream compares to other options out there.

Tech	Wi-Fi	Wi-Fi + Cellular Combo Units	Shakespeare Stream with Your Phone
			
Speed	x Slow at crowded dock	x Connects to available Wi-Fi even if slow	✓ Fast, 4G speeds
Availability	x Only at the dock	x Switches to Cellular when away from dock but cellular signals are not boosted	✓ Accessible at the dock, along the coast and popular cruising routes Boosts signal when weak
Affordability	✓ Inexpensive	x Equipment can get expensive. Needs an additional data plan	✓ Inexpensive No additional plan required

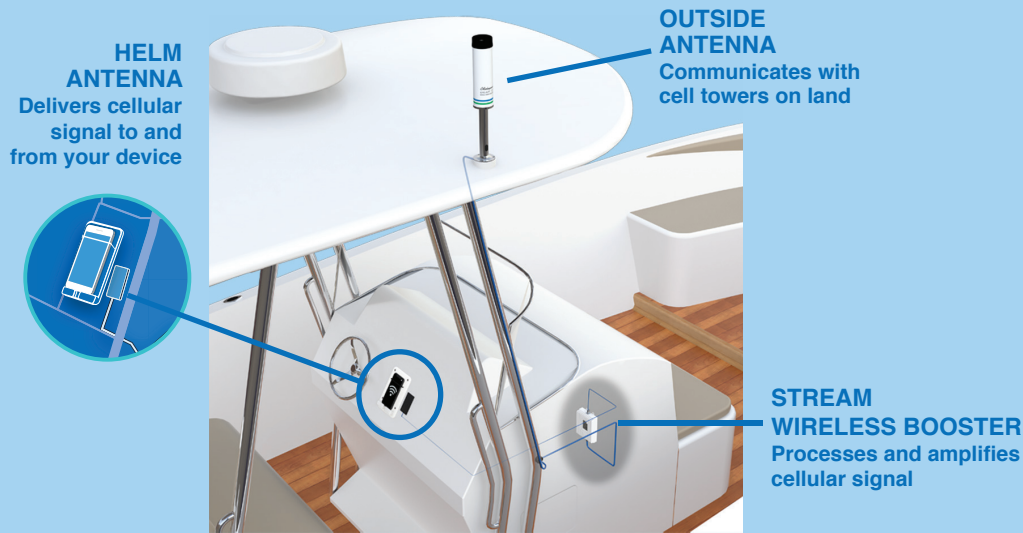

Take advantage of your existing cellular devices and unlimited plans^[1] to bring internet onto your boat. The Shakespeare Stream is compatible with most cellular devices and major cellular service providers in the US and Canada.

Compatible Carriers: AT&T, Verizon, T-Mobile in the US and other major Canadian networks

How Does It Work?

Designed for boats of all sizes^[2], the Shakespeare Stream uses Shakespeare's state-of-the-art marine cellular booster technology to amplify weak cell signals along inshore, coastal and popular cruising routes, enabling boaters to use data on their cellular devices more reliably.

Have more than one device that needs an internet connection? Use your boosted cellular device to host a hotspot. **TECH TIP:** Consider using a dedicated mobile hotspot device that can be left plugged in to save on phone battery. Whether you are struggling with slow Wi-Fi at the dock or have spotty cellular service^[3] on the water, enjoy the internet at up to 4G speeds with the Shakespeare Stream™ wireless booster and your cellular device.

Features:

- Compatible with cellular-enabled tablets, phones, mobile hotspots or other cellular devices.
- 5-Band amplifier works with AT&T, T-Mobile and Verizon 4G, 3G, & 2G in the US and other major Canadian networks.
- Plug & play installation.
- High quality marine grade materials and design.
- FCC certified. Automatic gain control and shutdown does not allow interference with the cell towers.

Model No: CA-STREAM Specifications

Compatible Service Providers:	AT&T, T-Mobile and Verizon 4G, 3G, & 2G in the US and other major Canadian networks
Uplink Frequency Range (MHz):	698-716 / 776-787 / 824-849 / 1850-1915 / 1710-1755
Downlink Frequency Range (MHz):	728-746 / 746-757 / 869-894 / 1930-1995 / 2110-2155
Input / Output Impedance:	50 Ω
Maximum Gain:	50 dB
Maximum Uplink Power:	29.0 dBm
Supported Standards:	CDMA, WCDMA, GSM, EDGE, HSPA+, EVDO, LTE and all cellular standards
Maximum Output Power:	1 Watt EIRP
Cable:	10ft SC-174 pre-wired on internal antenna 20ft SC-240 for external antenna
RF Connectors:	Booster - FME Male (both ends) External antenna - N-type Female
Power Supply / Consumption:	6-15V DC, 2.1A Max. @ 12 V DC
Dimensions:	5.625 x 4 x 1.125 inches
Weight:	1.43 lbs

[1] Available data plans vary by cellular service provider. Check with your cellular service provider for plan details.

[2] A minimum of 3 ft separation is required between the inside helm antenna and the outside antenna. The larger the separation, the better the boost.

[3] Some cell signal is required for the Shakespeare Stream to enhance usable cellular signal coverage.
