

NSX® ULTRAWIDE

EXPAND YOUR HORIZONS

Introducing our first ever ultrawide display... NSX ULTRAWIDE offers a new perspective on boating. Discover an all-new aspect ratio for our most immersive experience yet. Why settle for anything less?

Expand Your Horizons With Our First Ever Ultrawide Display

NSX ULTRAWIDE delivers all the benefits of dual screens in one place, for a more streamlined, more immersive experience. Experience perfectly-optimized splits and uninterrupted data flows that are easier to digest – unlocking more data, more controls, more possibilities.

Create Show-Stopping Dashboards

There's nothing else like NSX ULTRAWIDE - creating eye-catching, low-profile dashboards that stand out instantly. The unique ultrawide display is built to be simpler, cleaner, and more elegant than anything else in the marina.

The cutting-edge aspect ratio is also the perfect place to explore our latest operating system. A simplified presentation delivers game-changing ease of use, with streamlined menus and fully customizable panels.

The Ultimate Charting Experience with C-MAP® DISCOVER™ X and REVEAL™ X

Charts never looked as good as they do on NSX ULTRAWIDE. The ultrawide display's high pixel density shows super-sharp resolution on C-MAP DISCOVER X. And an upgrade to REVEAL X adds incredible shaded relief and satellite imagery.

The revolutionary C-MAP Safety Alerts automatically alert you to hazards up ahead, from shallow waters to buoys. And – in an industry first – the X-Chart Manager lets you manage C-MAP chart updates and upgrades directly from your device, with the ability to choose custom areas for a near-instant download.

For total flexibility, NSX ULTRAWIDE is also compatible with charting options, such as CMOR, Florida Marine Tracks, Strike Lines and Standard Mapping* (*US Only).

Superior Integration

All the same incredible connectivity you'd find on NSX. Best-in-class Mercury® integration, compatibility with a wide range of 1kW transducers, and – of course – full compatibility across the Simrad® electronics suite.

Demonstration of Benefits Table

Key Point	Benefit	Demo
<p>Expand your Horizons with our First ever Ultrawide Display</p>	<p>NSX® ULTRAWIDE delivers all the benefits of dual screens in one place, for a more streamlined, more immersive experience.
