

Scanstrut Vertical Entry Cable Seal – now compatible with Starlink!

100% watertight

Ultra strong & impact resistant

Easy fit cable routing

UV stable & hard wearing

No messy sealant on bungs

Split Bung

Introducing our premium Vertical Entry Cable Seal – now compatible with Starlink, the perfect solution for seamlessly integrating Starlink onboard your RV or yacht, achieving an IP68-rated 100% waterproof seal.

Featuring a split bung design, which allows you to install without removing Starlink cable connector.

The sleek, dome-shaped profile is not only aesthetically pleasing but also impact-resistant for added durability. With the addition of captive nuts in the base, this Starlink compatible cable seal makes installation quick and hassle-free!

Easy and Reliable Installation

Captive nuts make for easy assembly and allow reliable repeat installations. Each unit is supplied with both pre-drilled and blank inner bungs, to allow for multiple cable size and to make your installation as easy as possible.

Multi-Functional Dome Shape

The aesthetic dome-shaped profile provides a stronger, impact-resistant, durable design, that ensures an IP68-rated 100% waterproof seal.

Split Bungs

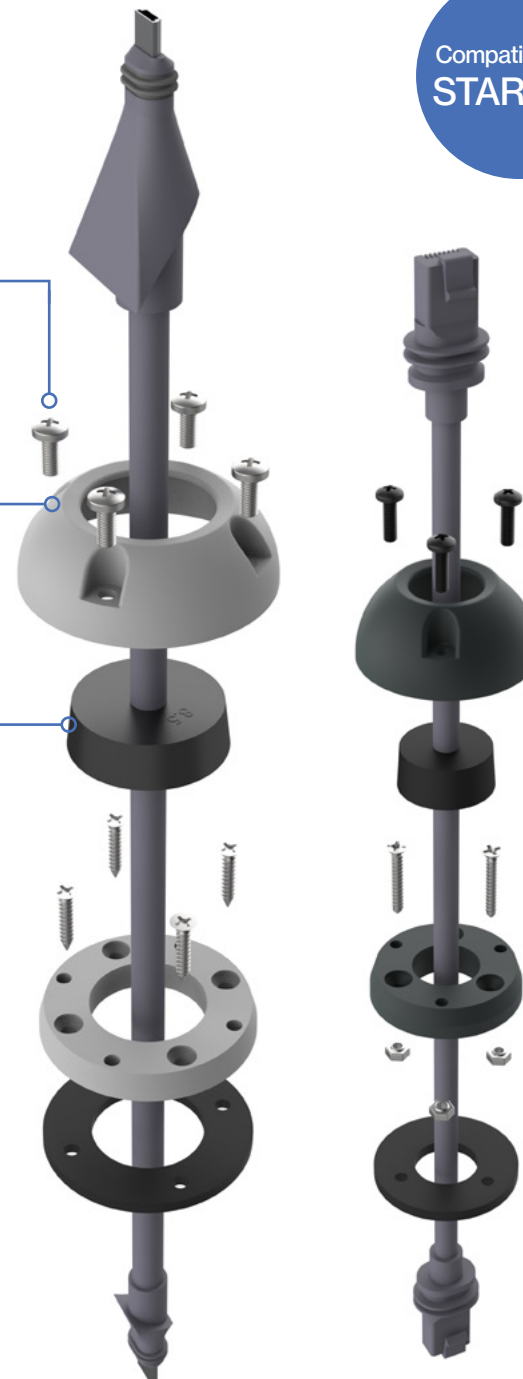

The split-bung makes installation even easier and faster, as it does not require the connectors to be removed, or cables to be cut during installation. Also included is a blank bung – which can be used to replace, during winterization.
