

VHF

3 dB High Performance VHF fiberglass antenna, foam injected, 1,2 m (4') length, FME female connector

KS-41

Code: PF AN NVHF00044T

3 dB High Performance VHF fiberglass antenna, foam injected, 1,2 m (4') length, FME female connector, black finish

**KS-41
Black Edition**

Code: PF AN NVHF00045T

4' HIGH

AM-FM

High Performance AM-FM fiberglass antenna, foam injected, 1,2 m (4') length

KS-120

Code: PF AN NAMFM011T

High Performance AM-FM fiberglass antenna, foam injected, 1,2 m (4') length, black finish

**KS-120
Black Edition**

Code: PF AN NAMFM012T

AIS

3 dB High Performance AIS fiberglass antenna, foam injected, 1,2 m (4') length, FME female connector

KS-31

Code: PF AN NAIS005T

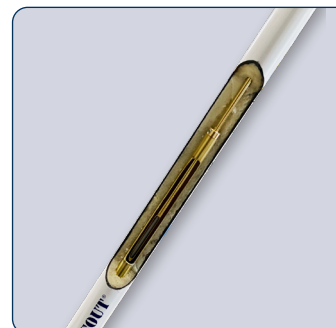

Multiple mounting solutions

FME connector + adaptor to PL included (VHF and AIS)

IP69 foam injected body

The new **TITAN series** antennas perfectly combine the technical characteristics of **robustness** and **performance** of 8' antennas in just 4' of length. Constructed from a solid 2 mm thick fibreglass body, with an electropolished AISI 316 stainless steel ferrule featuring an exclusive conical design, solid internal brass and copper elements and empowered by the original **Scout foam injection system** which allow these antennas to boast an **IP69** water resistance level.

The antennas (VHF and AIS models) are supplied with 6m (20') low-loss RG-58 coax cable with a **pre-installed FME female connector**, to allow a quick connection to the VHF/AIS device without need of plugging and soldering, thanks to the FME male/PL male adaptor (included).

With the high gloss anti-UV finish and excellent transmission/reception performance the TITAN series is a **premium choice** for any type of powerboat.

- ▶ Top performance with 4' high
- ▶ Foam injected, IP69 waterproof
- ▶ Stainless steel ferrule
- ▶ Multiple installation options
- ▶ Pre-installed connectors
- ▶ Exclusive design Made in Italy
