

JL AUDIO® A60 AND A60-H

MARINE HEAD UNITS

PRODUCT OVERVIEW

Enjoy high-quality audio on the open water in up to 4 zones with the JL Audio A60 and A60-H advanced marine head units. Built-in Digital Signal Processing (DSP) technology optimizes the audio sent to your system and protects your audio components for a superior listening experience. The A60 features a sleek, aesthetic design with a 2.95" high-resolution color display that complements modern helms, while the A60-H features a compact design that can be hidden away to save space at the helm. Both head units support Bluetooth® LE for advanced audio streaming and wireless control with the Garmin Audio™ app or compatible Garmin smartwatches and NMEA 2000® connectivity for wired integration with compatible Garmin MFDs.

JL AUDIO® A60 AND A60-H

MARINE HEAD UNITS

KEY FEATURES

HIGH-RESOLUTION COLOR DISPLAY

Enjoy a clear view of your audio information on the A60 head unit's 2.95-inch color screen. It's fog-resistant and daylight-readable to stay visible, no matter the weather conditions.

COMPACT DESIGN

Designed to save space at the helm, A60-H can be hidden away in your boat's dash or mounted in a variety of areas such as storage lockers, inside helm consoles and other concealed compartments.

DSP TECHNOLOGY

Built-in DSP technology optimizes the audio signal sent to your system and manages the power delivered to your speakers and subwoofers for a superior listening experience.

OVER-THE-AIR SOFTWARE UPDATES

Wireless software updates via Bluetooth® LE technology are available from compatible smart devices with the free Garmin Audio™ app.

WIRELESS AUDIO CONTROL

Easily control your audio from anywhere on your boat with your compatible Garmin smartwatch or the Garmin Audio smartphone app.

NMEA 2000® COMPATIBILITY

These marine head units are compatible with NMEA 2000 networks, ensuring premium audio control via Garmin MFDs and the JL Audio NRX-300 wired remote (sold separately).
