ResQLink™: The ultimate survival gear for boaters, outdoorsmen and pilots

YOUR LINK TO SAFETY

The ResQLink™ broadcasts a unique registered
distress signal with a GPS fix on your position. A
powerful 406 MHz signal relays your information
to search and rescue satellites. Search and rescue
teams use a separate homing signal emitted
from your beacon to reach your
location.

from civilization

ResQLink™
YOUR BEST LAST CHANCE

In an emergency, the ACR ResQLink™ is essential survival gear for boaters, outdoorsmen and pilots.

Now smaller, lighter and more affordable than ever, ACR's GPS-enabled ResQLink™ uses proven technology that has helped save over 28,000 lives since 1982. With three levels of integrated signal technology – GPS positioning, a powerful 406 MHz signal and 121.5 MHz homing capability – the ResQLink™ quickly and accurately relays your location to a worldwide search and rescue satellite system, typically within five minutes. ResQLink™ guides rescuers to within 100 meters or less of your position.

Just want to let family and friends know you're okay? The new 406Link.com* feature allows you to check in with specified individuals via email or text messaging without activating the emergency function or draining critical battery power.

Take along the ACR ResQLink™ on your next adventure. In a crisis situation, it's your best last chance.

*Optional subscription service; see 406Link.com for details

Why more PLB owners choose ACR

ACR—The choice of U.S. Military, NATO, Coast Guard, and arctic explorers

Small Size	1.3 x 1.9 x 3.9" / (3.3 x 4.8 x 9.9 cm)
Light Weight	4.6 oz. / (130 g)
Satellite Power	5+ watts. More likely to reach satellites in bad weather
Satellite Testing	Clearly confirms beacon is working properly before the need to activate it*
GPS Receiver	66 channel receiver. Acquires position faster from a cold start
Strobe Light	Automatic – ON during entire activation

*See www.406Link.com for more details

- Easy activation: simply deploy antenna and press ON button
- Waterproof, optional flotation pouch available
- Two handy self-test options for internal electronics and GPS functionality
- Fits easily in pocket, backpack or flight suit

Remember: A Personal Locator Beacon should be used ONLY in situations of grave and imminent danger and only as a last resort when all means of self-rescue have been exhausted.
