

Barton Composite Winches

Part #s 21200, 21201, 21202

The Barton range of composite winches offer a versatile alternative to conventional steel winches; cost effective, light weight, corrosion resistant and truly low maintenance. They feature a 316 stainless steel centre shaft and moulded-in stainless steel drum insert for wear resistance.

Three models are available - a single speed 8:1, twin speed 16:1 and twin speed 23:1 suitable as primaries for yachts up to 30ft and for halyard winches on larger craft. Comprehensive fitting & servicing instructions are available on our website and on our Youtube channel.

Red, blue and green top rings are included to enable color coding and there is a comprehensive spares package for each model. Fits all standard star lock pattern winch handles.

Model range:

21200: 8:1 single speed winch

21201 16:1 twin speed winch

21202 23:1 twin speed winch
