

Barton Aluminum Winch Handles

Part #s 21001, 21002

The Barton aluminum winch handles are designed to fit International Star sockets found in all makes of winch and standard deck filler caps.

Light duty and inexpensive, they come in two popular sizes. Each handle features a silver anodised profiled bar with an integral roller handle and star socket.

Intended for single speed winches and light use only, these have a working load of 88lbs (40kg)

#21001 - Length = 8" (225mm)
Weight = 10oz (290grms)

#21002 - Length = 10" (280mm)
Weight = 12oz (335grms)
