DOMELIT™
LED Area Light

The DomeLit illuminates a four-foot area with the push of a button, creating instant visibility wherever you hang, hook, wear, or stick it.

Our DomeLit is a multi-functional LED area light that's as transportable as you need it to be. Attached to a loop of adjustable elastic, the DomeLit can be hung wherever there's a hook, bar, pole, or tree branch that it can be looped around. Once there, with a simple press of a button, it creates instant flood illumination. Perfect for tents, garages, sheds, and workrooms, the DomeLit can also be worn around your wrist or strapped to your ankle to increase personal visibility when you're working or playing outdoors at night. For semi-permanent placement, we've included an adhesive strip of hook-and-loop, which you can affix to the surface of your choice. Attach one side to the DomeLit, the other to the inside of a dark cupboard or closet, press them together, and voila! Instant overhead lighting. Powered by two replaceable, long-lasting Lithium batteries (included), the DomeLit has two modes to choose from: steady glow (for reading, working, and navigating), and continuous flash (for safety and signaling).

⊕ Portable LED Area Light - package includes DomeLit LED Light and
   1) adhesive hook & loop for attachment.
