Latest additions to the Hella marine range

## New! Surface Mount Oblong Courtesy lamps

Stylish and easy to install LED courtesy lamps provide safe, reliable and energy efficient lighting for interior or exterior applications

Oblong LED lamps are now available in a surface mount design for easier installation while still offering all the quality, efficiency and reliability you can expect from Hella marine.

Featuring a slim and stylish design these lamps are ideal for illuminating onboard areas such as steps, stairs, toe kicks, storage areas, companion ways, deck fittings, signs and switches.

To install simply drill a 10mm hole for the cable, connect the two wires, screw lamp in place and cover fastenings with supplied end caps of stainless steel bezel.

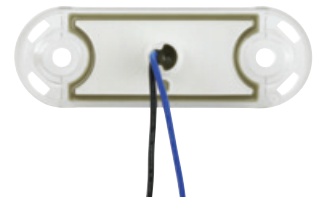

All LED lamps are reverse polarity protected and Multivolt electronics ensure constant light output in 12V or 24V DC systems.

Each lamp is completely sealed, highly shock, impact and vibration resistant making them suitable for the demanding marine environment. Lamps can be installed on a vessel's interior or exterior, in wet or dry conditions.

Highly Polished 316 stainless steel bezels are included with each lamp. 2 x Black and 2 x white plastic end caps are also supplied for installation without the bezel.

Satin and gold plated 316 stainless steel bezels are offered as optional accessories. See reverse of flyer for more details.

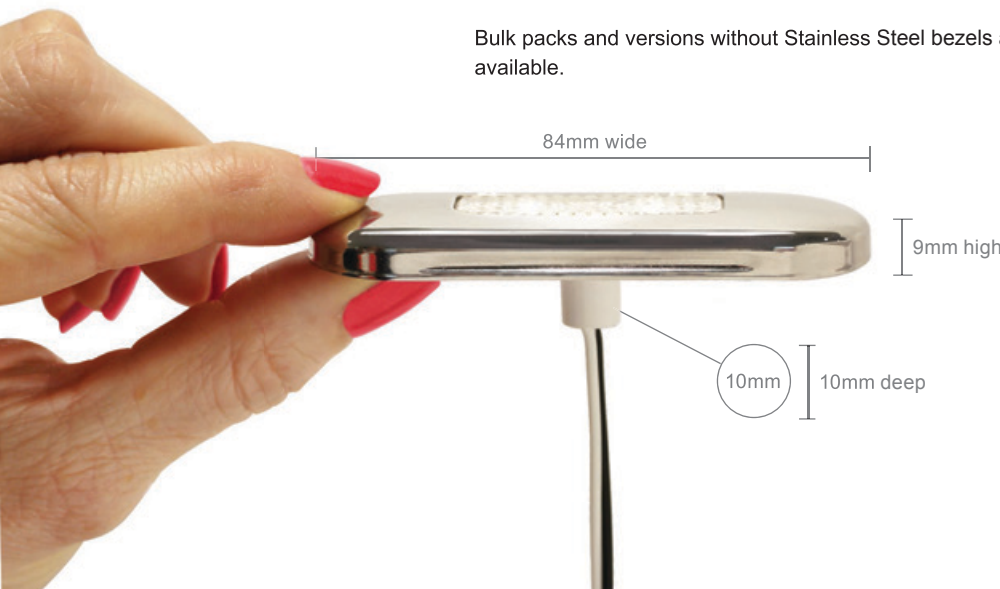

Bulk packs and versions without Stainless Steel bezels are also available.

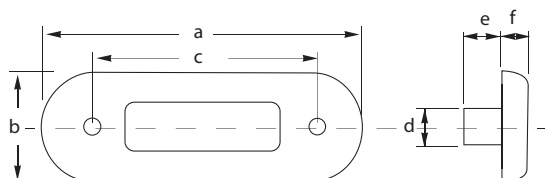

- Completely sealed housing
- Pre-wired with marine cable

Each lamp is supplied with 2 x white end caps plus 2 x black end caps

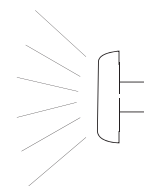

<b>Lens Material</b>	UV resistant enhanced impact Grilamid
