

PORTABLE LOCKING TRANSOM CROSS TIE CLEAT, 15°

Taco Marine introduces a new Transom Cross Tie device that ensures the ability to get dock lines up and away from outboard motors when tying off at the stern and for motor cowling protection. The patent pending latch mechanism at the base allows easy insertion and hold into standard rod holders. Added features provide multiple use applications in a single, stowable product.

FEATURES & BENEFITS

- Brushed Aluminum finish
- 15° large s-shape 9" cleat design
- Sleeve diameter 1-1/2" fits into standard rod holders 1-5/8" diameter
- Patent pending latching mechanism holds into rod holder
- Accommodates up to 5/8" dock line for large boat applications
- Loop hole design allows multiple applications
- Ideal for elevated cross tie of lines
- Reusable mesh bag ideal for quick drying and for avoiding scratches on deck or storage surfaces
- Not intended for permanent docking
- Intended for open bottom gunnel rod holders
