KEY FEATURES

**3 YEAR
WARRANTY**

BUILT-IN CD/DVD PLAYER WITH hdmi CONNECTIVITY - SUPPORTING ARC (AUDIO RETURN CHANNEL)

The MS-AV755 utilises a standard definition hdmi connection for quick plug-and-play compatibility with any supported television or monitor for DVD playback.

This also provides ARC functionality via the hdmi cable, enabling audio from the connected television to be streamed to the FUSION stereo.

Note: An hdmi 1.4 + Ethernet Cable is required (not included), and should be connected to the hdmi port of the TV labelled hdmi ARC. Select the ARC source on the MS-AV755. Refer to the TV manual to find out how to activate ARC on the television.

AUDIO STREAMING

PANDORA RADIO CONTROL

The MS-AV755 supports Pandora control, a dedicated source for Apple devices when connected via USB.

Thumbs up and Thumbs down functionality is accessed from the front face to help tailor the music to your preferences.

Pandora control from the MS-AV755 user interface includes adding or removing stations, shuffling and skipping stations.

Note: Pandora support for compatible Apple devices via USB and Bluetooth. Android support via Bluetooth only.

A2DP BLUETOOTH AUDIO STREAMING

Stream music from any supported Bluetooth media device directly to the FUSION MS-AV755. AVRCP enables song data to be displayed on screen. Control is available from the stereo, FUSION-Link MFD or connected device.

SIRIUSXM SATELLITE RADIO

Simply connect the optional SiriusXM Connect Tuner to experience SiriusXM satellite radio service on the open sea.

Note: SiriusXM is only available in the United States.

Visit www.siriusxm.com for more info

FUSION-LINK CONTROL

WIRED CONTROL - NMEA 2000 & ETHERNET

The MS-AV755 is NMEA2000 certified with Ethernet connection options. This enables a FUSION-Link certified Multi-Function Display (MFD) access to full functionality of the unparalleled FUSION audio interface, making the MFD the control center for the entire vessel.

For localized audio control a FUSION NRX Series remote can be installed in each zone.

Visit www.fusion-link.com for compatible MFD's.

WIRELESS CONTROL - BLUETOOTH, WI-FI & ANT™ TECHNOLOGY

The MS-AV755 now supports wireless control via ANT™ technology from your compatible Garmin watch.

Download the free FUSION-Link Lite app from the Connect IQ Store today.

Download the free FUSION-Link remote control app for Bluetooth and wi-fi from the Apple® App Store or Google Play™ and enjoy the freedom of wireless control from your compatible smartphone. Wi-Fi* connection supports control only.

* **Note:** Wireless router required

KEY FEATURES

MULTI-ZONE TECHNOLOGY

The FUSION MS-AV755 offers independent control of the balance, subwoofer and volume level in four separate audio zones.

Multi-Zone Technology also includes functionality for naming zones, linking zones, disabling unused zones or setting volume limits.

APPLE iOS AND ANDROID/WINDOWS MTP MEDIA PLAYBACK

Comprehensive control of any supported Apple or Android/Windows MTP media device is made easy with FUSION's fully integrated user interface. Navigating through thousands of tracks is intuitive when utilizing FUSION's Alpha Search Technology, allowing you to quickly navigate to any song based on a numerical or alphabetical identifier.

OPTICALLY BONDED COLOR LCD DISPLAY

The widescreen LCD display is optically bonded to improve durability and eliminate the possibility of condensation or fogging appearing while out on the water. The color display will showcase iPod, USB and MTP album art on screen where available. Able to resist extreme temperatures and operate in direct sunlight.

CLASS-D AMPLIFICATION

The high efficiency design, 2-Ohm stereo stable 280 Watt amplifier increases power output to create louder and clearer audio while reducing current draw.

To ensure reliability and longevity of hardware components the Class-D Amplifier has been placed in its own chamber inside the side-fin heat sink to ensure maximum heat dissipation.

Save power by turning the internal amplifier off to reduce heat and current draw, when the internal amplifier is not required.

GLASS FILLED COMPOSITE CHASSIS

Designed and engineered with a glass filled composite chassis to electrically isolate the stereo from the hull and eliminate corrosion from dissimilar metals.
