

DESCRIPTION:

Nano Cleaner Wax™ utilizes nano-sized polishing agents and waxes to restore brilliant gloss and provide protection to weathered fiberglass gel coats. In a single step, this formula removes light oxidation, contaminants and other minor surface imperfections while depositing a silicone polymer wax that bonds to the surface creating long-lasting shine and protection.

DIRECTIONS:

Directions: Before applying, make sure surface is clean, cool and dry. Do not apply to hot surface or in direct sunlight. Shake well. Apply with a soft cloth or wax applicator pad. To remove surface contaminants, apply light to medium pressure to work wax into surface using horizontal and vertical strokes until contaminant is removed. Remove product by hand with a clean, soft cloth or with a random orbital polisher. To provide protection, spread wax to a thin, even film. Allow to dry to a light haze and polish off by hand or with a random orbital polisher.

FEATURES & BENEFITS

Removes light oxidation, contaminants and other minor surface imperfections	<ul style="list-style-type: none">Improves the look of the finish by deep cleaning the surface and removing imperfections
Restores brilliant gloss to weathered gel coat surfaces	<ul style="list-style-type: none">Gives your boat's surface the maximum reflectivity to provide that like new appearance.
Cleans, polishes and protects in a single step	<ul style="list-style-type: none">Saves you time and money by completing multiple steps at once
Provides long-lasting protection against salt air, water and corrosion	<ul style="list-style-type: none">Extends the finish of your boat to reduce costly rework

PRESTA® MARINE PRODUCTS
KEEPING YOUR WATERCRAFT CLEAN & PROTECTED

RECOMMENDED PAD:

Apply with a soft cloth or a wax applicator pad

PACKAGE SIZES:

Gallons 166801

PRODUCT FAQ'S:

Q1: How do I know when to remove the wax?

A1: Once the product has begun to haze it should be removed. If the product is applied in direct sunlight, on a hot surface, or allowed to sit on a surface for extended period of time it can become very difficult to remove.

Q2: How long can I expect the wax to protect the surfaces on my boat?

A2: Any surface above the water line will be protected up 6 months by using Marine Nano Cleaner Wax

Q3: Is Nano Cleaner Wax Compound paint shop safe?

A3: No, the product does contain waxes and silicones that could cause paint issues if used in areas where fresh paint is being sprayed or applied.

Q4: Can I use this product if my boat is heavily oxidized?

A4: This product was designed to remove light oxidation on a gel coat surface. If the product is heavily oxidized the surface may need to be compounded first before adding Marine Nano Cleaner Wax.
