

# MFR SERIES MULTI-WAN ROUTERS

# Aigean Multi-WAN Routers

Aigean's Multi-WAN routers enable networks to switch between multiple internet sources without adversely affecting the onboard local network. Coupled with advanced features such as failover and smart switching, a vessel's connection to the internet is more robust, secure, and faster than with a single-source configuration.

Most modern vessels are equipped with multiple means of connecting to the internet, via ship-to-shore Wi-Fi, cellular, and satellite providers. Aigean's Multi-WAN routers couple these sources together, creating a seamless experience, ensuring you are always connected.

Aigean's MFR models are extremely easy to use and get started with. Forget tinkering with networking settings to get your system online, no networking knowledge is required.

## **Enterprise Chipset**

Intel-based architecture for max performance and longevity

## **Easy to Use**

Quick setup and an extremely user-friendly user interface

## **High Performance**

Get the most out of your provided internet speeds and bandwidth

## **Gigabit Ethernet**

1000 Mbps maximum transfer speeds on ALL ports (LAN & WAN)

#### **AigeanOS Compatible**

Combine with other Aigean products for maximum interoperability

# MFR Series Models

## MFR-3

**Sources** Maximum of 3

Ports 4x Gigabit

Form Desktop

Power 12V DC

**CPU** Intel Celeron J1900 (1.9 GHz)

## MAP-7

**Sources** Maximum of 7

Ports 8x Gigabit

Form Rackmount

Power AC Adapter

**CPU** Intel Celeron G3930 (2.9 GHz)

# Package Contents

- MFR Series Device
- Power Supply
- Power Cable
- Mounting hardware
- Quick Start Guide
- Warranty Information
