# MS-ERX400

APOLLO SERIES WIRED REMOTE
WITH ETHERNET CONNECTIVITY

APOLLO ERX400

PRODUCT OVERVIEW

Take control of your onboard entertainment with style! Introducing the new **Apollo ERX400 wired remote** with ethernet connectivity, this wired remote allows you to add full control of your audio entertainment to any zone on your boat. The Apollo ERX400 features modern design aesthetics and **our most intuitive user experience yet** in an ultra compact form factor. Installation is quick and easy with a shallow mounting depth and the need to only connect a single-powered Apollo ERX400 network/power cable to your compatible Fusion stereo. With the Apollo ERX400, controlling your onboard audio entertainment has never looked this good.

OPTICALLY BONDED 2.7" COLOR LCD DISPLAY WITH BLACK FRONT FACE

The Apollo ERX400 features the same 2.7" brilliant, optically bonded, full-color LCD display from the Apollo RA670 and SRX400 marine stereos. Color album art and metadata display information of the current track playing. The display is integrated into a black glass front face which allows the Apollo ERX400 to blend seamlessly with the aesthetics of your boat for a premium and elegant installation.

OUR MOST INTUITIVE USER EXPERIENCE YET

The Apollo ERX400 introduces a new intuitive user experience which allows for easy navigation and control of your entire boat's Apollo Series stereo network, making control of your audio and sources in any zone a seamless experience. Enjoy synchronized audio playback of one audio source across all Apollo Series stereos connected to the same network (Grouping), with individual and multiple (*ALL*) volume control for each stereo. You will also be able to turn on or off any Apollo Series stereo or remote connected on the network from your Apollo ERX400 (Power Options).

[1] Wi-Fi is a registered trademark of the Wi-Fi Alliance.

VERSATILE MOUNTING OPTIONS

The ultra shallow mounting depth of just 49 mm [1.93"] (including cable), makes the Apollo ERX400 ideal for installation where mounting depth is limited, for example, in thin wall cavities. The innovative design gives you the option of either mounting the wired remote with a conventional flush finish or integrating it into the helm with a premium flat finish.

TRUE-MARINE™ PHILOSOPHY

Fusion's True-Marine design philosophy stems from our experience confronting the harsh marine environment.
By designing and engineering from the ground up specifically for real-world boating applications, our customers are assured that the equipment they fit into their boat will deliver quality entertainment season after season — the Apollo ERX400 comes with a 3-year warranty.

SOFTWARE UPDATE OPTIONS

Over-the-air software updates available via the Fusion-Link™ app when connected to a wireless network router or integrated into a Wi-Fi®[1] enabled Apollo Series stereo network. Alternatively, you can update the Apollo ERX400 via a USB when connected to a USB-compatible Apollo Series stereo.

IPX6 & IPX7 WEATHER RESISTANCE RATING

The Apollo ERX400 meets international IPX6 and IPX7 rating standards from the front and back, providing confidence that your product will last season after season in the harsh marine outdoor environment.

CONNECTIVITY OPTIONS

Use the Ethernet Cable Connector (010-12922-01) to extend your Apollo ERX400's connection to your marine stereo using a RJ45 Ethernet cable or, alternatively, use the Garmin Network Cable Connector (010-12531-00) to extend the connection using a Garmin Network Cable *(Cables and connectors each sold separately)*.

KEY FEATURES

The **Apollo ERX400**, with its innovative technology and design, offers a new intuitive audio control experience, featuring:

KEY FEATURE — *2.7"* — The color LCD is optically bonded to improve durability and protection against condensation and fogging, and is optimized for daylight viewing. Enjoy enhanced aesthetics with color album art and metadata to display information of the current track playing.

KEY FEATURE — The Apollo ERX400 introduces a new intuitive user experience which allows for seamless navigation and control of your entire boat's Apollo Series stereo network, for quick and easy adjustment of your audio and sources in any zone.

KEY FEATURE — *TRUE MARINE* — Fusion's True-Marine design philosophy stems from our experience confronting the harsh marine environment. By designing and engineering from the ground up specifically for real-world boating applications, our customers are assured that the equipment they fit into their boat will deliver quality entertainment season after season.

When connected to a wireless network router or integrated into a Wi-Fi®[1] enabled Apollo Series stereo network, enjoy over-the-air software updates via the Fusion-Link™ app to keep your remote always up-to-date with the latest features and functionalities.

Multiple mounting options are available for the Apollo ERX400 wired remote. You can install it with a conventional flush mount finish or integrate it into a glass helm with a flat surface finish. Alternatively, it can be surface-mounted with an optional accessory spacer.

IP X7 — Enjoy confidence that your Apollo ERX400 will last season after season in the harsh marine and outdoor environment. Meeting both IPX6 and IPX7 international standards from the front and back for water resistance when installed correctly, the Apollo ERX400 is built to last on board.

ETHERNET — The Apollo ERX400 connects to your compatible Fusion stereo and is powered using only a single ERX400 network/power cable, allowing for easy installation (8 meter cable is included in the box).
The compact design of the Apollo ERX400 increases installation options and versatility, making it easier to add premium audio control on board.

PRODUCT COMPATIBILITY

STEREOS

APOLLO RA770

MS-RA770 | SKU 010-01905-00

Through creative design and technological brilliance, a purpose-built marine audio entertainment system featuring many world-firsts has been created, including many innovations you are used to at home. Tap and swipe your way intuitively through your playlists with the glass touchscreen display, even with wet fingers, and enjoy high-quality music all day long with Wi-Fi®[1] streaming using Apple AirPlay® 2 or UPnP.

[1] Wi-Fi is a registered trademark of the Wi-Fi Alliance.
APOLLO RA670

MS-RA670 | SKU 010-02138-00

Award-winning innovation re-embodied, the Apollo RA670 features Fusion's DSP technology, PartyBus™-Network* capability, over-the-air software updates*, Wi-Fi®[1] audio streaming* with Apple AirPlay® 2*, Multi-Zone™ technology in up to 3 Zones, optical audio input, Fusion-Link™ integration, and an optically bonded 2.7" color display - the RA670 is truly a powerful extension of the Apollo Series.

* When connected to a wireless network router or integrated into a Wi-Fi enabled Apollo Series stereo network.

APOLLO WB670

MS-WB670 | SKU 010-02346-00

Designed to simplify dash space at the helm, the new Apollo WB670 hideaway system inherits key audio innovations from the Apollo RA670 re-engineered in a compact, space-saving form factor, allowing for installation in out-of-way places such as storage lockers, inside helm consoles and other hidden compartments. Key features include Fusion's DSP technology, PartyBus™-Network* capability, Fusion-Link™ integration and more.

* When connected to a wireless network router or integrated into a Wi-Fi enabled Apollo Series stereo network.

ACCESSORIES
