# Universal Wi-Fi Remote

CONTROL MODULE FOR RCL SEARCHLIGHTS

FREE Mobile App

The URW-102 Universal Wi-Fi Remote Control Module works in conjunction with the free ACR Searchlight App to allow users to wirelessly control their RCL-100 Searchlight. With the Wi-Fi Module connected and the app downloaded from either the App Store (Apple) or Google Play Store (Android), you're able to use your phone or tablet to wirelessly control your RCL-100 Searchlight from anywhere on board your vessel.

# Universal Wi-Fi Remote

## CONTROL MODULE FOR RCL SEARCHLIGHTS

The URW-102 is simple to install and conveniently provides access to all the functionality available through the standard RCL-100 Point Pad, including ACR's exclusive XRCiZ™ feature. This handy feature can be activated via the ACR Searchlight App causing the searchlight to independently rotate every 30 days from activation to ensure all bearing surfaces of the searchlight are free of corrosion and all electrical contacts functional. While the URW-102 is designed to work in conjunction with your RCL-100 and the existing point pad, it creates a convenient second station that you can command from anywhere.

Through an integrated wireless adaptor, the Wi-Fi Module creates a wireless hotspot on board your vessel making it easy to connect your phone or tablet. In the event that your mobile device does not have an internal GPS, such as a Wi-Fi only iPad, the Wi-Fi Module also has an NMEA0183 input that allows an external GPS to provide position information for display in the ACR Searchlight App.

Regardless of what lies ahead, count on the URW-102 Wi-Fi Module to help keep your light shining where you want it, from wherever you are.

### FEATURES AND BENEFITS:

- Easy and convenient to use
- Control your RCL-100 searchlight from anywhere on the boat
- Free app download for both Apple and Android Devices
- Simple installation
- Supplied with a 2dB Wi-Fi Antenna
- Low power consumption (0.1 Amp)

### ACR Searchlight Compatibility:

- RCL-100D
- RCL-100 LED
