

Barton Deck Organizers

Constructed from spectro grey or black anodised aluminum sides and base with acetal sheaves rotating around a 316 stainless steel hollow rivet through which fixing bolts are fitted (not supplied).

Organizers are used to divert mast base control lines back to the cockpit. The units can be double stacked as required, smallest number of sheaves to the top and inboard, to prevent snagging on Genoa sheets.

Size 1 suitable for yachts up to 32ft (9.75m) and with halyard size of 7/16" (12mm) or less.

Size 2 suitable for yachts above 32ft (9.75m) with halyard size up to 9/16" (14mm)

Available with 2, 3, 4, 5 or 6 sheaves in both sizes.
