VeX™ Pipe Mounting Fixture Ruler

Instructions

1) Print and cut out the ruler.

> **IMPORTANT:** This file must be printed actual size (100%). Printer output options such as "Fit to Page" and "Shrink Oversized Pages" will distort the ruler size and affect its accuracy.

2) Cut out the center section labled, "CUT OUT THIS AREA".

3) Tape the end of the ruler (where indicated) so that it is perpendicular to the pipe being measured.

4) Wrap the ruler snugly around the pipe and back onto itself. The orange line at the taped end should be visible through the cut-out center window and should line up with the appropriate clamp SKU number for your installation.

5) Purchase measuring calipers to aid in future installations.

SKU	MODEL	SKU	MODEL
93700	PS-SWMCP-B-0.750	91183	PS-SWMCP-B-1.875
