

Tx Switch Box SB-181 Installation Guide

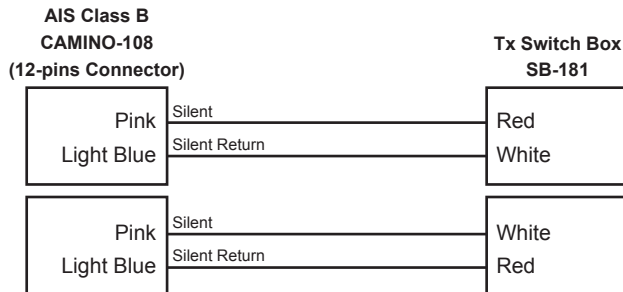

The AMEC Tx switch box SB-181 is specifically designed for CAMINO-108 AIS class B transponder series to support the Tx-off function (entering silent mode).

Installation:

1. Mounting: Install the unit on wall or table with the two screws supplied.

2. The both ways of wiring illustrated below are acceptable:

Operation:

The silent mode can be enabled or disabled by pressing the toggle switch – “0” means Tx OFF (silent mode); „I” means Tx ON (transmission on). When the transponder is set in silent mode, the LED indicator will turn on red steadily. Please refer to the user manual of your AMEC AIS transponder for more details.
