

Product Spotlight – Model iD20

Brand:
Rule

What is it?
12 VDC Inflator

Where is it primarily used?
At the dock or on a boat, camping, in the driveway, on an RV

Why would a customer use it?

The iD20 is a very small, portable inflator that attaches to a vehicle's (car, boat, ATV) battery to quickly blow up an inflatable accessory such as a kiddie pool, inflatable mattress, rigid inflatable boat (RIB), tag-along boat toy. Various connectors help the customer adapt the iD20 to different accessories.

Fills 10' x 6' x 22"
inflatable pool under
1.5 minutes

How is it installed and used?

The customer chooses which adaptor is needed to attach the iD20 to the toy needing air. Connect the clamps to the vehicle's battery and squeeze the orange trigger. The inflator will fill most medium sized inflatable accessories to a medium-firm to firm level in under 2 minutes.
