IMPORTANT NOTICE

General

- This manual has been authored with simplified grammar, to meet the needs of international users.

- The operator of this equipment must read and follow the descriptions in this manual. Wrong operation or maintenance can cancel the warranty or cause injury.

- Do not copy any part of this manual without written permission from FURUNO.

- If this manual is lost or worn, contact your dealer about replacement.

- The contents of this manual and equipment specifications can change without notice.

- The example screens (or illustrations) shown in this manual can be different from the screens you see on your display. The screens you see depend on your system configuration and equipment settings.

- Save this manual for future reference.

- Any modification of the equipment (including software) by persons not authorized by FURUNO will cancel the warranty.

- All brand and product names are trademarks, registered trademarks or service marks of their respective holders.

## How to discard this product

Discard this product according to local regulations for the disposal of industrial waste. For disposal in the USA, see the homepage of the Electronics Industries Alliance (http://www.eiae.org/) for the correct method of disposal.

How to discard a used battery

Some FURUNO products have a battery(ies). To see if your product has a battery(ies), see the chapter on Maintenance. Follow the instructions below if a battery(ies) is used. Tape the + and - terminals of battery before dispossal to prevent fire, heat generation caused by short circuit.

In the European Union

The crossed-out trash can symbol indicates that all types of batteries must not be discarded in standard trash, or at a trash site. Take the used batteries to a battery collection site according to your national legislation and the Batteries Directive 2006/66/EU.
In the USA

The Mobius loop symbol (three chasing arrows) indicates that Ni-Cd and lead-acid rechargeable batteries must be recycled. Take the used batteries to a battery collection site according to local laws.
In the other countries

There are no international standards for the battery recycle symbol. The number of symbols can increase when the other countries make their own recycle symbols in the future.

⚠ SAFETY INSTRUCTIONS

The operator and installer must read the applicable safety instructions before attempting to operate or install the equipment.

⚠ WARNING	Indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.
⚠ CAUTION	Indicates a potentially hazardous situation which, if not avoided, can result in minor or moderate injury.

⚠ Warning, Caution	🚫 Prohibitive Action	❗ Mandatory Action

⚠ WARNING

🚫 **Do not disassemble or modify the equipment.**

Fire, electrical shock or serious injury can occur.

❗ **Turn off the power immediately if water leaks into the equipment or the equipment is emitting smoke or fire.**

Continued use of the equipment can cause fire or electrical shock.

❗ **Turn off the power at the mains switchboard before beginning the installation.**

Fire, electrical shock or serious injury can result if the power is left on or is applied while the equipment is being installed.

❗ **Be sure that the power supply is compatible with the voltage rating of the equipment.**

Connection of an incorrect power supply can cause fire or equipment damage. The voltage rating of the equipment appears on the label above the power connector.

❗ **Observe the following safe compass distances to prevent interference to a magnetic compass:**

	Standard compass	Steering compass
GP-39	0.60 m	0.40 m

⚠ WARNING

🚫 **Do not install the equipment where it may get wet from rain or water splash.**

Water in the equipment can result in fire, electrical shock or damage to the equipment.

⚠ CAUTION

🚫 **The glass of an LCD panel breaks easily. Handle the LCD carefully.**

Injury can result if the glass breaks.

❗ **No single navigation aid (including this unit) should ever be relied upon as the exclusive means for navigating your vessel.**

❗ The navigator is responsible for checking all aids available to confirm his position. Electronic aids are intended to assist, not replace, the navigator.

⏚ **Ground the equipment to prevent electrical shock and mutual interference.**

TABLE OF CONTENTS

FOREWORD

A Word to the Owner of the GP-39

Congratulations on your choice of the GP-39 GPS Navigator.

Since 1948, FURUNO Electric Company has enjoyed an enviable reputation for innovative and dependable marine electronics is furthered by our extensive global network of agents and dealers.

Your navigator is designed and constructed to meet the rigorous demands of the marine environment. However, no machine can perform its intended function unless installed, operated and maintained properly. Please carefully read and follow the recommended procedures for installation, operation and maintenance.

We would appreciate feedback from you, the end-user, about where we are achieving our purposes.

Thank you for considering and purchasing FURUNO equipment.

Features

The main features of the GP-39 are as shown below.

- High-resolution color LCD
- WAAS capability
- Storage for 10,000 waypoints, 100 routes and 3,000 track points
- Alarms: Arrival/Anchor, XTE (Cross-track Error), Trip, Odometer, Time, WAAS and Speed
- Man overboard feature records position at time of man overboard and provides continuous updates of range and bearing when navigating to the MOB position.
- Unique Highway display provides a graphic presentation of boat's progress toward a waypoint.
- User-programmable nav data displays provide analog and digital navigation data.
- Navigation data output to the autopilot when connecting.
- Waypoint and route data can be uploaded/downloaded via a USB flash memory* to the GP-39.
  * USB flash memory is a trade mark of USB Implementers Forum, Inc.

1. OPERATIONAL OVERVIEW

1.1 Controls

Key	Description
 ◀ GP-39 ▶ (Cursorpad)	- Shifts the cursor. - Selects item on menus.
MENU	- Opens the Menu. (For plotter and highway displays, press twice, For other displays, press once) - Shows the zoom window (plotter and highway displays only).
ENT CNTR	- Long press: Returns own ship position to center (plotter display only). - Momentary press: Confirms selection on menus.
DISP	Selects display mode.
GO TO	Sets destination.
MARK MOB	- Long press: Inscribes MOB mark. - Momentary press: Registers own ship position as waypoint.
BRILL	- Long press: Turns power off. - Momentary press: Turns power on./Shows Brill window.

How to detach the hard cover from the unit

Put your thumbs on the front of the cover and forefingers at its back edge, and pull it toward you.

Press here with thumb and pull cover forward.
1.2   How to Turn Power On/Off

1. Press the ⏻/**BRILL** key to turn on the power. The unit beeps and then starts up with the last-used display mode. Your equipment takes about 90 seconds to find its position. The equipment shows receiver status indication at the top left-hand corner in most display modes. The table below shows these indications and their meanings.

Status indications

Indication	Meaning
2D	2D GPS position fixed
3D	3D GPS position fixed
W2D	2D WAAS position fixed
W3D	3D WAAS position fixed
DOP*	2D: HDOP larger than 4 3D: PDOP larger than 6
SIM	Simulation mode
- - -	Not fixed

*: DOP (Dilution of Precision) is the index of position accuracy, and it is the distribution pattern of satellites used in position fixing. Generally, the smaller the figure the better the position accuracy. (HDOP: Horizontal DOP, PDOP: Position DOP)

2. To turn off the power, press and hold down the ⏻/**BRILL** key for three seconds. The time remaining until the power is turned off is counted down on the display.

Note: The screen refreshes slower in low ambient temperature.

1.3   How to Adjust LCD and Key Panel Brilliance

1. Press the ⏻ /**BRILL** key to show the following window.

```
Brill

LCD  ◄ Min        Max ►
  4   [████████████        ]
KEY  ▼ Min        Max ▲
  3   [██████              ]
```
2. To adjust the LCD brilliance, press ⏻ /**BRILL** key.
    The setting changes "0→1→…→7→6…0→1…" continuously. Maximum setting is 7. You can use also the cursorpad (◄, ►) to adjust the brilliance.

3. To adjust the panel brilliance, press the cursorpad (▲, ▼, max: 7).

4. Press **ENT/CNTR** or **MENU** key.

1.4   Display Modes

Your unit has seven display modes: Plotter Display, Highway Display, Steering Display, Nav Data Display, Satellite Monitor Display and User Display 1 and User Display 2. Press the **DISP** key to select a display mode. Each time the key is pressed, the display mode changes in the sequence shown below. To step through the displays in reverse order, press the **DISP** key more than three seconds.

[1]: Plotter display → DISP → [2]: Highway display → DISP → [3]: Steering display

[3] → DISP → [4]: Nav Data display → DISP → [5]: Satellite Monitor display → DISP → [6]: User display 1 → DISP → [7]: User display 2 → DISP → [1]: Plotter display

User Display 1 and User Display 2

- Digital display
  The digital display shows digital navigation data. You can select what data to display in one to four cells. The choices of data are odometer distance, trip distance, time, date, position, power source voltage, speed over ground, course over ground, range, bearing, cross-track-error, time-to-go to a destination, estimated time of arrival at destination, waypoint and none.

- Speedometer display
  The speedometer display provides both digital and analog displays of speed over ground.

- COG display
  The COG display shows both analog course over ground, and digital speed over ground.

1.5   Menu Overview

Most operations of your unit are done through the menu. Below is a quick introduction on how to select a menu and change menu settings. If you get lost in operation, press the **MENU** key to return to the main menu.

1. Press the **MENU** key once or twice to display the main menu.
    Press once: Steering display, nav data display, satellite monitor display, user display 1 and user display 2.
    Press twice: Plotter display, highway display.

    Note: Following explanation takes the menus for the plotter display as an example.

```
Menu
Ship To Center*
Tracks
Waypoints
Routes                                    ↑
Plotter Setup                          Cursor
Alarms
Messages

GPS Setup
WAAS

[MENU] :Cancel/Back  [ENT/CNTR] :Enter        ▲/▼:Select
```
     *: Shown only when the **MENU** key is pressed at the plotter display.

2. Press ▲ or ▼ to select an item, and press the **ENT/CNTR** key.

3. Press **ENT/CNTR** (or ▶) key.
    For example, select [Plotter Setup] and press the **ENT/CNTR** key.

```
Menu >Plotter Setup

Auto Waypoint Entry(COG) : Off            60 °    10 s
COG Line                 : On
COG/BRG ref.             : Mag

WP Name                  : Disp All
TTG/ETA SPD              : Auto           60 s
```
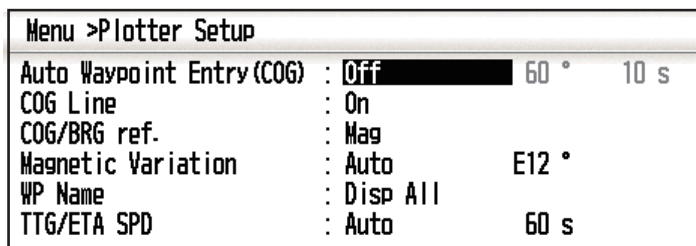

4. Press ▲ or ▼ to select option desired.
    For example, select [COG/BRG ref.]

5. Press the **ENT/CNTR** key (or ▶).
    A window appears showing the options for the selected item.

```
True
Mag
```

6. Press ▲ or ▼ to select option desired.

7. Press the **ENT/CNTR** key (or ▶).

8. Press the **MENU** key (or ◀) twice to close the menu.

How to enter alphanumeric data

Some menu operations require you to enter alphanumeric data (A to Z, 0 to 9) and symbols (&, _, #,' , -, > and space). The procedure which follows shows how to enter alphanumeric data. For example, to change the waypoint name "WP0006" to "KOBE", do as follows:

Cursor ➞ WP0006
1) Press ▲ or ▼ to select "K".
2) Press ▶, and press ▲ or ▼ to select "O".
3) Press ▶, and press ▲ or ▼ to select "B".
4) Press ▶, and press ▲ or ▼ to select "E".
5) Press ▶, and press ▲ or ▼ to select " "(space).
6) Press ▶, and press ▲ or ▼ to select " " (space).
7) Press the **ENT/CNTR** key.

1.6 How to Enter the MOB Mark

The MOB mark denotes man overboard position. Only one MOB mark is displayed. Each time the MOB mark is entered the previous MOB mark and its position data are overwritten.

1. Press the **MARK/MOB** key until the following message appears.

```
MOB
                    Saved To MOB

                    Goto MOB ?

          Yes              No

[MENU/ZOOM]:Cancel/Back [ENT]:Enter      ▲/▼:Select
```
2. To set the MOB position as the destination, confirm that [Yes] is selected and press the **ENT/CNTR** key. MOB mark ("M") appears and a blue line is drawn between own ship mark and the MOB mark. This line shows the shortest course to go to the MOB position, and arrows on the line show the direction to the MOB position.

Shortest course from own ship to MOB position (blue)   MOB mark (red)

Bearing from own ship to MOB position
Range from own ship to MOB position
2. PLOTTER DISPLAY OVERVIEW

2.1 How to Select the Display Range

You can change the display range on the plotter and highway displays. The available horizontal range for the plotter display is: 0.02, 0.05, 0.1, 0.2, 0.5, 1, 2, 5, 10, 20, 40, 80, 160 and 320 nautical miles. The available horizontal range for the highway display is: 0.2, 0.4, 0.8, 1, 2, 4, 8 and 16 nautical miles.

1. Press the **MENU** key on the plotter or highway display.
   The following window appears.

(Plotter display)   *(Highway display)*

2. Press ▲ or ▼ to select range you want.

3. Press the **ENT/CNTR** key.

2.2 How to Shift the Cursor

Use the cursorpad to shift the cursor. The cursor moves in the direction of the arrow or diagonal.

Cursor state and position indication

The position indication, shown at bottom of the plotter display, changes according to cursor state.

Cursor at rest

When the cursor is not shown, boat's position in longitude and latitude or TDs (depending on the menu setting) appears at the bottom of the display.

Cursor state and position indication

Cursor position is displayed in latitude and longitude or TDs at the bottom of the plotter display when the cursor is shown.

If there is no operation for about seven seconds, the cursor disappears.
2.3 How to Shift the Display

The display can be shifted on the plotter display.

1. Press the cursorpad to show the cursor.
2. Press and hold down an arrow on the cursorpad.
    When the cursor is placed at an edge of the screen, the display shifts in the direction opposite to cursorpad operation.

Centering own ship's position

When own ship tracks off the plotter display, the own ship mark is automatically returned to the screen center. You can also return it manually by pressing and holding the **ENT/CNTR** key for more than three seconds.

2.4 How to Display/Hide Track and COG Line

The own ship's track and COG line can be displayed or hidden separately on the plotter display.

1. Press the cursorpad to show the cursor.
2. Operate the cursorpad to place the cursor on the own ship mark.
3. Press the **ENT/CNTR** key to show the pop-up window.
    The default setting is On for Track and COG Line, so the following pop-up window for Off setting appears.

4. Select [Track Off] or [COG Line Off] to hide the track or COG line, and press the **ENT/CNTR** key. To display the track or COG line, select [Track On] or [COG Line On] and press the **ENT/CNTR** key.

2.5 How to Change Track Plotting Interval, Stop Recording

To trace the boat's track, the boat's position is stored into the memory at an interval of distance or according to display range. For distance, a shorter interval provides better reconstruction of the track, but the storage time of the track is shortened. When the track memory becomes full, the oldest track is erased to make room for the latest. The current percentage of the memory used can be confirmed by choosing [Tracks] on the menu.

1. Press the **MENU** key twice to show the main menu.

2. Select [Tracks], and press the **ENT/CNTR** key.

Percentage of the memory used
3. Confirm that the [Rec] is selected, and press the **ENT/CNTR** key.
4. Select [Off], [Distance] or [Auto], and press the **ENT/CNTR** key.
   Off: Track is not recorded. This setting is useful when you do not need to record track.
   Distance: Track is recorded and plotted at the distance interval set.
   Auto: Plotting and recording interval changes with display range selected.

5. For [Off] or [Auto], go to step 6. For [Distance], enter the recording interval as follows:

   1) Press ▶.

   2) Press **ENT/CNTR** key.

   3) Use the cursorpad to enter the interval, and press the **ENT/CNTR** key.
      For entering the numeric data, see page 1-9.

6. Press the **MENU** key twice to close the menu.

2.6 How to Change Track Color

You can select the color for the tracks among red, yellow, green, blue, purple, black and brown. It is useful to change the color to distinguish tracks at different times of a day, for example.

1. Press the **MENU** key twice to show the main menu.
2. Select [Tracks], and press the **ENT/CNTR** key.
3. Select [Color], and press the **ENT/CNTR** key.

```
Red
Yellow
Green
Blue
Purple
Black
Brown
```

4. Select the color to use for the track, and press the **ENT/CNTR** key.
5. Press the **MENU** key twice to close the menu.

2.7 How to Erase Track

The tracks can be erased collectively or by color. The tracks cannot be restored once erased, therefore be absolutely sure you want to erase the tracks.

2.7.1 How to erase track by color

1. Press the **MENU** key twice to show the main menu.
2. Select [Tracks], and press the **ENT/CNTR** key.
3. Select [Delete], and press the **ENT/CNTR** key.

```
All
By Color
```
4. Select [By Color], and press the **ENT/CNTR** key.

```
Red
Yellow
Green
Blue
Purple
Black
Brown
```
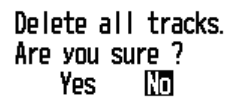

5. Select the track color to erase, and press the **ENT/CNTR** key.
   The window shown below appears.

```
Delete all tracks by color
in Red.
Are you sure ?
     Yes        No
```
6. Press ◄ to select [Yes], and press the **ENT/CNTR** key.
   The tracks with the color selected at step 5 are erased.
   Note: To cancel, select [No] at this step.

7. Press the **MENU** key twice to close the menu.

2.7.2   How to erase all tracks

1. Press the **MENU** key twice to show the main menu.

2. Select [Tracks], and press the **ENT/CNTR** key.

3. Select [Delete], and press the **ENT/CNTR** key.

4. Select [All], and press the **ENT/CNTR** key.

```
Delete all tracks.
Are you sure ?
    Yes    No
```

5. Press ◄ to select [Yes], and press the **ENT/CNTR** key to erase all tracks.
    [Track Memory Used] on the Tracks menu shows "0%".

6. Press the **MENU** key twice to close the menu.

This page is intentionally left blank.

3. WAYPOINTS

3.1 How to Enter Waypoints

In navigation terminology a waypoint is a particular location on a voyage, whether it be a starting, intermediate or destination waypoint. Your unit can store 10,000 waypoints. Waypoints can be entered on the plotter display: at cursor position, at own ship's position, through the waypoints list and at the MOB position. Also, waypoints can be entered automatically when your boat changes course prominently.

3.1.1 How to enter a waypoint with the cursor

1. Use the cursorpad to place the cursor on the location desired for a waypoint.

2. Press the **ENT/CNTR** key to enter the waypoint mark (default shape: green solid circle). This waypoint is named with the youngest unused waypoint number, and saved to the waypoint list.

3.1.2 How to enter a waypoint at own ship position

Press the **MARK/MOB** key to enter the waypoint mark (default shape: green solid circle). This waypoint is named with the youngest unused waypoint number, and saved to the waypoint list.

3.1.3 How to enter a waypoint through the list

1. Press the **MENU** key to show the main menu.

2. Select [Waypoints], and press the **ENT/CNTR** key.

3. Select [Alpha] or [Distance], and press the **ENT/CNTR** key.

4. Press the **ENT/CNTR** key to show the waypoint list.

Menu >Waypoints >Waypoint List				
Name	Symbol	Color	RNG(NM)	BRG(°)

```

The default name, Lat/Lon and Comment are as follows:
Name: The youngest unused waypoint number.
Lat, Lon: Current own ship position
Comment: Current date/time

6. To change the waypoint name, press the **ENT/CNTR** key.

Cursor ➝ [WP0006]
7. Operate the cursorpad to change the waypoint name (max. 8 characters).

8. To change the mark shape, select [Symbol] and press the **ENT/CNTR** key.

9. Select a mark desired, and press the **ENT/CNTR** key.

10. To change the mark color, select [Color], and press the **ENT/CNTR** key.

```
Red
Yellow
Green
Blue
Purple
Black
Brown
```

11. Select a color desired, and press the **ENT/CNTR** key.

12. To change the position, do as follows:

    1) Select [Lat], and press the **ENT/CNTR** key.

    2) Enter the latitude, and press the **ENT/CNTR** key.

    3) Press ▼ to select [Lon], and press the **ENT/CNTR** key.

    4) Enter the longitude, and press the **ENT/CNTR** key.

13. To change the comment, select [Comment] and press the **ENT/CNTR** key.

14. Enter the comment, and press the **ENT/CNTR** key.

15. Press the **MENU** key to register the new waypoint into the list.

16. To register other waypoints, repeat steps 4 through 14.

17. Press the **MENU** key several times to close the menu.

3.1.4 How to enter waypoints automatically

Waypoints can be entered automatically when your course changes by a specified degree. This function is useful for following the recorded waypoints on an outward voyage in reverse when you return home. To set the criteria for automatic entering of waypoints, do the following:

1. Press the **MENU** key twice to show the main menu.

2. Select [Plotter Setup], and press the **ENT/CNTR** key.

```
Menu >Plotter Setup

Auto Waypoint Entry(COG)  : Off          60 °    10 s
COG Line                  : On
COG/BRG ref.              : Mag
Magnetic Variation        : Auto         E12 °
WP Name                   : Disp All
TTG/ETA SPD               : Auto         60 s
```

3. Select [Auto Waypoint Entry (COG)], and press the **ENT/CNTR** key.

4. Select [On], and press the **ENT/CNTR** key.

5. Press ▶ to select the degree setting, and press the **ENT/CNTR** key.

6. Enter the degree, and press the **ENT/CNTR** key (setting range: 15 to 150°).

7. Press ▶ to select the seconds setting, and press the **ENT/CNTR** key.

8. Enter the seconds, and press the **ENT/CNTR** key (setting range: 1 to 60 seconds).

9. Press the **MENU** key twice to close the menu.

3.2   How to Display Waypoint Name

You can display waypoint names as follows:

1. Press the **MENU** key twice to show the main menu.

2. Select [Plotter Setup], and press the **ENT/CNTR** key.

```
 Menu >Plotter Setup

 Auto Waypoint Entry(COG)  : Off          60 °    10 s
 COG Line                  : On
 COG/BRG ref.              : Mag
 Magnetic Variation        : Auto         E14 °
 WP Name                   : Disp Goto
 TTG/ETA SPD               : Auto         60 s

 [MENU]:Cancel/Back [ENT/CNTR]:Enter      ▲/▼:Select
```

3. Select [WP Name], and press the **ENT/CNTR** key.

```
 Disp Goto
 Disp All
 Disp Route
```
4. Select [Disp Goto], [Disp All] or [Disp Route], and press the **ENT/CNTR** key.
    Disp Goto: Displays only the destination waypoint name.
    Disp All: Displays all waypoint names.
    Disp Route: Displays all waypoint names in the route when it is set as destination.

5. Press the **MENU** key twice to close the menu.

3.3 How to Edit Waypoints

Waypoint position, name, mark shape and comment can be edited on the plotter display or through the waypoint list.

Note: When the waypoint selected is set as the destination, the message "Change The Waypoint. Are you sure?" appears.

3.3.1 How to edit waypoints on the plotter display

1. Operate the cursorpad to place the cursor on the waypoint to edit.
2. Press the **ENT/CNTR** key to show the pop-up window.

```
┌──────────┐
│  WP0003  │
├──────────┤
│ Goto     │
│ Move     │
│ Edit     │
│ Delete   │
└──────────┘
```
3. Select [Edit], and press the **ENT/CNTR** key to show the waypoint information.
4. Edit the waypoint (see the paragraph 3.1.3).
5. Press the **MENU** key to return to the plotter display.

3.3.2 How to edit waypoints through the list

1. Press the **MENU** key twice to show the main menu.
2. Select [Waypoints], and press the **ENT/CNTR** key.
3. Select [Alpha] or [Distance], and press the **ENT/CNTR** key.
    Alpha: The list shows waypoints in alphabetical order.
    Distance: The list shows waypoints from the nearest to the furthest.
4. Select the waypoint to edit, and press the **ENT/CNTR** key to show the pop-up window.

```
┌────────┐
│ Goto   │
│ Edit   │
│ Delete │
└────────┘
```

5. Select [Edit], and press the **ENT/CNTR** key to show the waypoint information.
6. Edit the waypoint data (see the paragraph 3.1.3).
7. Press the **MENU** key several times to close the menu.

3.4   How to Move Waypoints

You can move waypoints to any position on the plotter display.

1. Operate the cursorpad to place the cursor on the waypoint to move.

2. Press the **ENT/CNTR** key to show the pop-up window.

```
WP0003

Goto
Move
Edit
Delete
```
3. Select [Move], and press the **ENT/CNTR** key to show the waypoint information.

4. Operate the cursorpad to move the cursor to the new position.

5. Press the **ENT/CNTR** key.

3.5   How to Erase Waypoints

You can erase individual or all waypoint(s).

Note: You cannot individually erase the waypoint used as the current destination. (See paragraphs paragraph 3.5.1, paragraph 3.5.2.)

3.5.1   How to erase a waypoint on the plotter display

1. Operate the cursorpad to place the cursor on the waypoint to erase.

2. Press the **ENT/CNTR** key to show the pop-up window.

```
WP0003

Goto
Move
Edit
Delete
```
3. Select [Delete], and press the **ENT/CNTR** key.

3.5.2   How to erase a waypoint through the waypoint list

1. Press the **MENU** key twice to show the main menu.
2. Select [Waypoints], and press the **ENT/CNTR** key.

3. Select [Alpha] or [Distance], and press the **ENT/CNTR** key.

4. Select the waypoint to erase, and press the **ENT/CNTR** key.

```
Goto
Edit
Delete
```

5. Select [Delete], and press the **ENT/CNTR** key.

6. Press the **MENU** key several times to close the menu.

3.5.3 How to erase all waypoints

1. Press the **MENU** key twice to show the main menu.

2. Select [Delete], and press the **ENT/CNTR** key.

```
 Menu >Delete
 All Waypoints        : Off
 All Routes           : Off

 [MENU]:Cancel/Back  [ENT/CNTR]:Enter        ▲/▼:Select
```

3. Confirm that [All Waypoints] is selected, and press the **ENT/CNTR** key.

```
 Off
 Delete
```

4. Select [Delete], and press the **ENT/CNTR** key.

```
 Delete all waypoints.
 Are you sure ?
      Yes      No
```

When no waypoint is set as destination

```
 Waypoint is set as a destination.
 Are you sure to delete all waypoints ?
      Yes           No
```
When a waypoint is set as destination

5. Select [Yes], and press the **ENT/CNTR** key to erase all waypoints.
   Note: To cancel, select [No].

6. Press the **MENU** key twice to close the menu.

This page is intentionally left blank.

4. ROUTES

In many cases a trip from one place to another involves several course changes, requiring a series of waypoints which you navigate to, one after another. The sequence of waypoints leading to the ultimate destination is called a route. Your unit can automatically advance to the next waypoint on a route, so you do not have to change the destination waypoint repeatedly.

4.1 How to Create Routes

You can store up to 100 routes, and a route can have 30 waypoints. A route is constructed with the waypoints you have entered.
Sample route

1. Press the **MENU** key twice to show the main menu.
2. Select [Routes], and press the **ENT/CNTR** key.
3. Select [Alpha] or [Distance], and press the **ENT/CNTR** key.
4. Press the **ENT/CNTR** key to show the route list.

5. Confirm that [New] is selected, and press the **ENT/CNTR** key to show the route information.

```
Routes >Route List >Route Info.
Name    : RT0001        Total LEG 0.00NM   0 Points
Cmnt    :          ->        LEG              BRG
  1 _____ :
  2 _____ :          ____NM              ___
  3 _____ :          ____NM              ___
  4 _____ :          ____NM              ___
  5 _____ :          ____NM              ___
  6 _____ :          ____NM              ___
  7 _____ :          ____NM              ___
  8 _____ :          ____NM              ___
[MENU]:Cancel/Back  [ENT/CNTR]:Enter        ▲/▼:Select
```

6. Press the **ENT/CNTR** key to change the route name.

▲
RT0001
▼

7. Operate the cursorpad to enter the route name, and press the **ENT/CNTR** key (maximum: six characters).

8. Press ▼. Confirm that the cursor is at the right of [Cmnt], and **ENT/CNTR** key.

▲
█   ->
▼
9. Operate the cursorpad to enter the comment (maximum: 18 characters).

10. Press ▼ to move the cursor to [1], and press the **ENT/CNTR** key.

Change
Add
Skip
Delete

11. Confirm that [Add] is selected, and press the **ENT/CNTR** key.

12. Select [Alpha] or [Distance], and press the **ENT/CNTR** key to show the waypoint list.

13. Select the waypoint to add to the route, and press the **ENT/CNTR** key.
    The selected waypoint (as the starting point) is registered to [1].

14. Press ▼ to select [2], and press the **ENT/CNTR** key.

15. Repeat steps 10 through 13 to complete the route.

16. Press the **MENU** key several times to close the menu.

4.2 How to Edit Routes

You can edit the route created.

Note: When the route that is selected is set as route navigation, the message "Route is set as a destination. Are you sure?" appears.
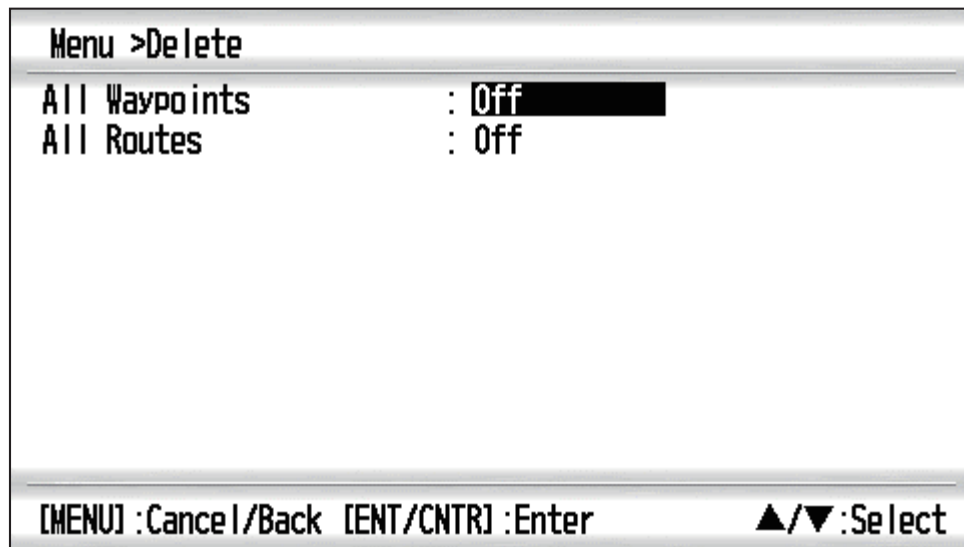

4.2.1 How to replace a waypoint in a route

1. Press the **MENU** key twice to show the main menu.
2. Select [Routes], and press the **ENT/CNTR** key.
3. Select [Alpha] or [Distance], and press the **ENT/CNTR** key to show the route list.
4. Select the route to edit, and press the **ENT/CNTR** key.

> Goto
> Edit
> Delete

5. Select [Edit], and press the **ENT/CNTR** key to show the route list.
6. Select the waypoint to replace, and press the **ENT/CNTR** key.

> Change
> Add
> Skip
> Delete
7. Select [Change], and press the **ENT/CNTR** key.
8. Select [Alpha] or [Distance], and press the **ENT/CNTR** key to show the waypoint list.
9. Select the new waypoint, and press the **ENT/CNTR** key.
10. Press the **MENU** key several times to close the menu.

4.2.2 How to delete a waypoint from a route

1. Press the **MENU** key twice to show the main menu.
2. Select [Routes], and press the **ENT/CNTR** key.
3. Select [Alpha] or [Distance], and press the **ENT/CNTR** key to show the route list.
4. Select the route to edit, and press the **ENT/CNTR** key.
5. Select [Edit], and press the **ENT/CNTR** key to show the route information.
6. Select the waypoint to delete from the route, and press the **ENT/CNTR** key.
7. Select [Delete], and press the **ENT/CNTR** key.
8. Press the **MENU** key several times to close the menu.

4. ROUTES

4.2.3 How to insert a waypoint in a route

To insert a waypoint in a route, do the following:

1. Press the **MENU** key twice to show the main menu.
2. Select [Routes], and press the **ENT/CNTR** key.
3. Select [Alpha] or [Distance], and press the **ENT/CNTR** key to show the route list.
4. Select the route to edit, and press the **ENT/CNTR** key.
5. Select [Edit], and press the **ENT/CNTR** key to show the route list.
6. Select the waypoint which will come after the waypoint to be inserted, and press the **ENT/CNTR** key.
7. Select [Add], and press the **ENT/CNTR** key.
8. Select [Alpha] or [Distance], and press the **ENT/CNTR** key to show the waypoint list.
9. Select the waypoint, and press the **ENT/CNTR** key.
10. Press the **MENU** key several times to close the menu.

4.2.4 How to temporarily deselect a waypoint in a route

You can temporarily deselect an unnecessary waypoint from a route. Using the route created in the illustration shown below as an example, deselect the second intermediate waypoint.
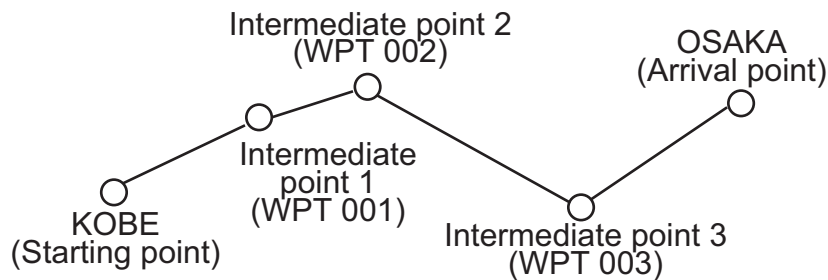

If you reconstruct the route without the second intermediate point it would look like the illustration below.
1. Press the **MENU** key twice to show the main menu.
2. Select [Routes], and press the **ENT/CNTR** key.
3. Select [Alpha] or [Distance], and press the **ENT/CNTR** key to select the route list.
4. Select the route to edit, and press the **ENT/CNTR** key.
5. Select [Edit], and press the **ENT/CNTR** key to show the route information.
6. Select the waypoint to skip, and press the **ENT/CNTR** key.

7. Select [Skip], and press the **ENT/CNTR** key to show "X" next to the waypoint se-
    lected at step 6.

8. Press the **MENU** key several times to close the menu.

Note: To restore a waypoint to a route, select [Skip Off] at step 7, and press the **ENT/
CNTR** key.

4.3   How to Erase a Route

You can erase routes individually or collectively.

4.3.1   How to erase a route through the route list

Note: The route used as route navigation can not be erased.

1. Press the **MENU** key twice to show the main menu.

2. Select [Routes], and press the **ENT/CNTR** key.

3. Select [Alpha] or [Distance], and press the **ENT/CNTR** key to show the route list.

4. Select the route to erase, and press the **ENT/CNTR** key.

5. Select [Delete], and press the **ENT/CNTR** key to erase the route selected at step
    4.

6. Press the **MENU** key several times to close the menu.

4.3.2   How to erase all routes

1. Press the **MENU** key twice to show the main menu.

2. Select [Delete], and press the **ENT/CNTR** key.

3. Select [All Routes], and press the **ENT/CNTR** key.

4. Select [Delete], and press the **ENT/CNTR** key to show the following message.

```
Delete all routes.
Are you sure?
Yes     No
```

When no route is set as destination

```
Route is set as destination.
Are you sure to delete all routes?
Yes     No
```

When a route is set as destination

5. Select [Yes], and press the **ENT/CNTR** key to erase all routes.
    Note: To cancel, select [No].

6. Press the **MENU** key twice to close the menu.

This page is intentionally left blank.

5. DESTINATION

Destination can be set four ways: by cursor, by waypoint, by route and by MOB position. The previous destination is cancelled whenever a new destination is set. How to set a MOB position is described in section 1.6. When setting a destination, a blue line is shown between own ship and the destination selected. Also, the range and bearing from own ship to the destination are shown at the left-hand side of the screen.

Range from own ship to the destination — Destination waypoint

Destination waypoint name

Bearing from own ship to the destination

Shortest course (blue)
5.1 How to Set Destination by Cursor Position

You can quickly set a destination called "Quick Point", i.e. "QP".

1. On the plotter display, operate the cursorpad to place the cursor on the location desired for destination.

2. Press the **GO TO** key to enter the quick point.
   The quick point is shown with a green solid circle, and named as "QP". This point is saved in the waypoint list automatically.

3. Cancel the destination, referring to section 5.4, when you arrive at the waypoint.

Note: Each quick point set is erased when a new one is entered.

5.2 How to Set Destination by Waypoint

You can set a waypoint as a destination by using the cursor or the waypoints list.

5.2.1 How to set a destination waypoint with the cursor

1. On the plotter display, operate the cursorpad to place the cursor on the waypoint which you want to set as the destination.
2. Press the **ENT/CNTR** key.

```
      WP0000
    Goto
    Move
    Edit
    Delete
```
3. Select [Goto], and press the **ENT/CNTR** key.
4. Cancel the destination, referring to section 5.4, when you arrive at the waypoint.

5.2.2 How to set a destination waypoint from the list

1. Press the **MENU** key twice to show the main menu.
2. Select [Waypoints], and press the **ENT/CNTR** key.
3. Select [Alpha] or [Distance], and press the **ENT/CNTR** key to show the waypoint list.

Menu >Waypoints >Waypoint List				
Name	Symbol	Color	RNG (NM)	BRG (°)
[New]				
G WP0001	●	■ Red	1. 11	167
WP0002	■	■ Red	0. 83	171
WP0003	◆	■ Red	0. 70	175
WP0004	⇌	■ Red	0. 64	177
WP0005	⇌	■ Red	0. 60	178

[MENU] :Cancel/Back [ENT/CNTR] :Enter   ▲/▼ :Select

4. Select the waypoint to set as a destination, and press the **ENT/CNTR** key.

```
    Goto
    Edit
    Delete
```

5. Select [Goto], and press the **ENT/CNTR** key to show the plotter display.
6. Cancel the destination, referring to section 5.4, when you arrive at the waypoint.

5.3 How to Set Route as Destination

You can set a route as destination through the list.

1. Press the **MENU** key twice to show the main menu.

2. Select [Routes], and press the **ENT/CNTR** key.

3. Select [Alpha] or [Distance], and press the **ENT/CNTR** key.

```
Menu >Routes >Route List

Name                              TLEG(NM)   Number
 [New]

 RT0003   : WP0001   ->WP0003       0.23        2

[MENU]:Cancel/Back  [ENT/CNTR]:Enter        ▲/▼:Select
```

4. Select the route to set as a destination, and press the **ENT/CNTR** key.

```
Goto
Edit
Delete
```

5. Select [Goto], and press the **ENT/CNTR** key.

6. Select [Forward] or [Reverse].
   Forward: Follows waypoints in order registered (1→2→3…)
   Reverse: Follows waypoints in reverse order registered (30 (when maximum entered) →29→28…→1)

7. Press the **ENT/CNTR** key to show the plotter display. The destination route is shown with waypoints connected with legs.

8. Cancel the destination referring to section 5.4 when arriving at the waypoint.

How to change the route direction after a destination is set

After a route is started, you can change the direction of the route from [Forward] to [Reverse], or vice versa. Place the cursor on a leg of the route, and press the **ENT/CNTR** key to show the following pop-up window. Select [Reverse] (or [Forward]). Then, select [Yes] and press the **ENT/CNTR** key.

```
     RT0000
Cancel Route
Reverse
Route Info.
```

Note: If your boat has not yet arrived at the first waypoint in the route, the current route destination is cancelled when you select [Reverse] (or [Forward]). Set the route destination again.

5.4 How to Cancel a Destination

You can cancel a destination by using the cursor, or through the list.

5.4.1 How to cancel a destination with the cursor

1. On the plotter display, operate the cursorpad to place the cursor on the waypoint (route) set as the current destination.

2. Press the **ENT/CNTR** key.

```
┌─────────────┐

[MENU]:Cancel/Back  [ENT/CNTR]:Enter        ▲/▼:Select
```

- [Waypoints-Alpha]: Waypoint list in alphabetical order
- [Waypoints-Distance]: Waypoint list showing waypoints near from current position.
- [Routes-Alpha]: Route list in alphabetical order.
- [Routes-Distance]: Route list showing routes in distance order.
- [QP]: Moves to plotter display to enter QP.

This page is intentionally left blank.

6. ALARMS

6.1 Overview

There are eight alarm conditions which generate both audio and visual alarms: Arrival alarm, Anchor watch alarm, XTE (Cross-Track Error) alarm, Speed alarm, WAAS alarm, Time alarm, Trip alarm and Odometer alarm.

When an alarm setting is violated, the buzzer sounds and the name of the offending alarm and the alarm icon appear on the display (alarms other than Speed Based Output).

You can silence the buzzer and remove the alarm indication by pressing any key. The alarm icon remains on the screen until the reason for the alarm is cleared.
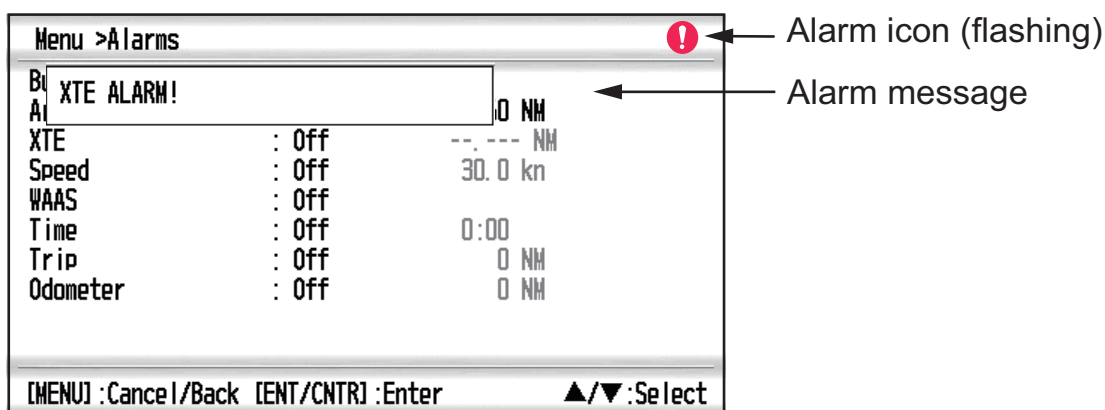

To know which alarm has been violated, do the following procedure.

1. Press the **MENU** key twice to show the main menu.
2. Select [Messages], and press the **ENT/CNTR** key.
Example alarm message

The display shows the names of offending alarms. When there are no alarms, the message "No Message! " appears.

6. ALARMS

Message and meanings

Message	Meaning
XTE ALARM!	The boat is off its intended course by the range set.
TIME ALARM!	The time set has come.
SPEED ALARM!	The boat's speed is higher than the range set.
ARRIVAL ALARM!	The boat is approaching the arrival area.
TRIP ALARM!	The boat has traveled further than the preset trip distance.
ODOMETER ALARM!	The boat has traveled the total distance set.
ANCHOR WATCH!	The boat has moved a certain distance (when it should be at rest).
NO WAAS SIGNAL!	WAAS signal cannot be found.

Note: The message screen also shows equipment trouble. See section 8.3.

6.2 Buzzer Type Selection

The buzzer sounds whenever an alarm setting is violated. You can select the type of buzzer as follows:

1. Press the **MENU** key twice to show the main menu.

2. Select [Alarms], and press the **ENT/CNTR** key.

3. Select [Buzzer], and press the **ENT/CNTR** key.

```
Short
Long
Continuous
```

4. Select buzzer type, and press the **ENT/CNTR** key.
   Short: Unit emits a short beep sound for 1 second and off for 1 second.
   Long: Unit emits a long beep sound for approximately 3 seconds for three times.
   Continuous: Unit continuously emits long beep sounds until a key is pressed.

5. Press the **MENU** key twice to close the menu.

6-2

6.3 How to Set an Alarm

Set alarms as below:

Note: For the Anchor alarm, press the **MARK/MOB** key to enter the waypoint at own ship's position, and set it as a destination referring to paragraph 5.2.1.

1. Press the **MENU** key twice to show the main menu.

2. Select [Alarms], and press the **ENT/CNTR** key.

```
Menu >Alarms
Buzzer          : Long
Arrival/Anchor  : Off      0. 50 NM
XTE             : Off      --. --- NM
Speed           : Off      30. 0 kn
WAAS            : Off
Time            : Off      0:00
Trip            : Off         0 NM
Odometer        : Off         0 NM

[MENU] :Cancel/Back  [ENT/CNTR] :Enter      ▲/▼:Select
```

3. Select an alarm item, and press the **ENT/CNTR** key.

4. Do one of the following:
   (Arrival/Anchor)

   1) Select [Arrival] or [Anchor], and press the **ENT/CNTR** key.

   2) Press ▶ and **ENT/CNTR** key.

   3) Enter the alarm area, and press the **ENT/CNTR** key.

   (XTE, Speed, Trip and Odometer)

   1) Select [On], and press the **ENT/CNTR** key.

   2) Press ▶ and **ENT/CNTR** key.

   3) Enter the value, and press the **ENT/CNTR** key.

   (WAAS)
   Select [On], and press the **ENT/CNTR** key.
   (Time)

   1) Select [On], and press the **ENT/CNTR** key.

   2) Press ▶ and **ENT/CNTR** key in order.

   3) Enter the time, and press the **ENT/CNTR** key.

   4) For 12-hour clock, press ▶ and **ENT/CNTR** key.

   5) Select [AM] or [PM], and press the **ENT/CNTR** key.

5. Press the **MENU** key twice to close the menu.

Note 1: To cancel an alarm, select [Off] at 1) on step 4.

Note 2: You can activate either the arrival alarm or the anchor watch alarm; they cannot be activated together.

6.4   Alarm Descriptions

Arrival alarm

The arrival alarm informs you that own ship is approaching a destination waypoint. The "arrival zone" is circle-shaped and the alarm setting is the radius of the circle. The alarm activates if your boat enters the circle.
How the arrival alarm works

Anchor watch alarm

The anchor watch alarm sounds to warn you that your boat is moving when it should be at rest. Before setting the anchor watch alarm, set current position as destination waypoint.
How the anchor watch alarm works

XTE (Cross-Track Error) alarm

The XTE alarm warns you when own ship is not on its intended course.
How the XTE alarm works

Speed alarm

The speed alarm alerts you when the boat's speed is higher than the alarm range set.

<u>WAAS alarm</u>

This alarm alerts you when the WAAS signal is lost (for all status indications except W2D/W3D). Note that [On] cannot be selected if [Mode] in [WAAS] menu is set to [GPS].

<u>Time alarm</u>

The time alarm works like an alarm clock, releasing audio and visual alarms when the time entered has come.

<u>Trip alarm</u>

The trip alarm tells you when your boat has traveled further than the preset trip distance.

<u>Odometer alarm</u>

This alarm alerts you when your boat has traveled the total distance you set.

This page is intentionally left blank.

7. OTHER FUNCTIONS

This chapter describes menu items not covered in other chapters.

7.1 Plotter Setup Menu

```
Menu >Plotter Setup
Auto Waypoint Entry(COG) : Off        60 °     10 s
COG Line                 : On
COG/BRG ref.             : Mag
Magnetic Variation       : Auto         E14 °
WP Name                  : Disp Goto
TTG/ETA SPD              : Auto         60 s

[MENU]:Cancel/Back [ENT/CNTR]:Enter        ▲/▼:Select
```
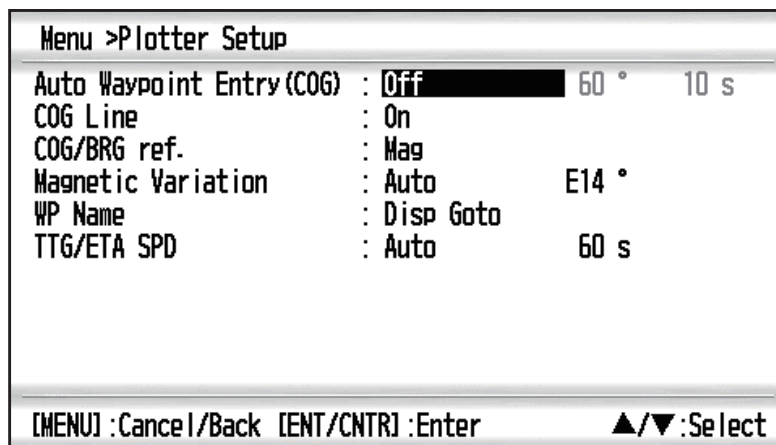

COG Line

You can show or hide the COG line on the plotter display.

COG/BRG ref.

Boat's course and bearing to a waypoint are displayed in true or magnetic bearing. Magnetic bearing is true bearing plus (or minus) earth's magnetic variation. Select the bearing reference according to the installed compass: magnetic for magnetic compass, true for gyrocompass or satellite compass using true bearing.

Magnetic Variation

The location of the magnetic north pole is different from the geographical north pole. This causes a difference between the true and magnetic north direction. The difference is called magnetic variation, and varies with respect to the observation point on earth. Your unit is pre-programmed with all the earth's magnetic variation. However, you may wish to enter variation manually to refine accuracy using the latest chart. Set [COG/BRG ref.] on the Plotter Setup menu to [Mag] to use magnetic variation.

To enter magnetic variation manually, do the following:

1) If necessary, change coordinate from east to west or vice versa.
2) Enter the value referring to a recent nautical chart.
3) Press the **ENT/CNTR** key.

TTG/ETA SPD

To calculate time to go and estimated time of arrival, enter your speed as below.

- Auto (GPS calculated speed)

1. Press ▶ and **ENT/CNTR** in order.
2. Enter the speed average (1 to 999 sec.) to use, and press the **ENT/CNTR** key.

- Manual (Speed calculated manually)

1. Press ▶ and **ENT/CNTR** in order.

2. Enter speed (1 to 999 knot), and press the **ENT/CNTR** key.

7.2　Delete Menu

You can delete all waypoints and routes listed in [Waypoint List] and [Route List].

```
Menu >Delete
All Waypoints        : Off
All Routes           : Off

[MENU]:Cancel/Back  [ENT/CNTR]:Enter        ▲/▼:Select
```
7.3　GPS Setup Menu

The GPS Setup menu smooths position and course, averages speed, applies position offset, and deactivates unhealthy satellites.

```
Menu >GPS Setup
Datum            : WGS84            3
Navigation       : Rhumb Line
Smooth Position  :    0 s
Smooth S/C       :    5 s
Lat Offset       : 0.000'N
Lon Offset       : 0.000'E
Disable SV       : -- -- --
SV ELV           :    5 °
Roll Over        : 2015

[MENU]:Cancel/Back  [ENT/CNTR]:Enter        ▲/▼:Select
```
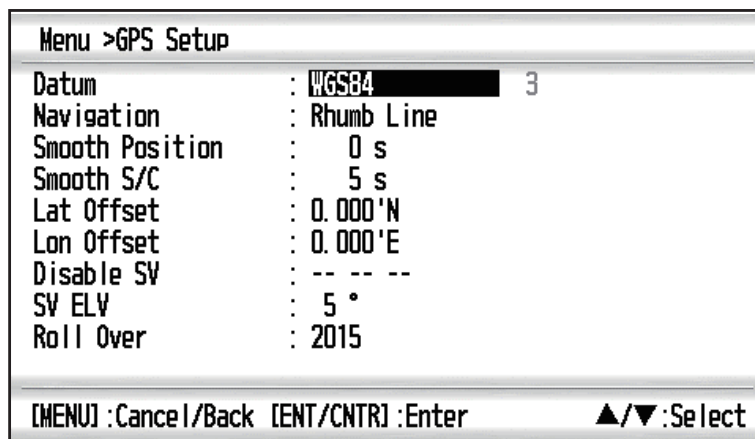

Datum

Your unit is programmed to recognize most of the major chart systems of the world. Although the WGS-84 system, the GPS standard, is now widely used other categories of charts still exist. Select the same datum which is used in your nautical charts. Select WGS84 (default setting), WGS72 or Other (Datum entry required).

Navigation

When you set a destination, the equipment displays the range, bearing and course to that destination. Range and bearing are calculated by the Great Circle or Rhumb Line method. Route total distance is also calculated. Cross-track error is only calculated in the Rhumb Line method.

Rhumb line: This method calculates the range and bearing between two points drawn on a nautical chart. Since the bearing is kept constant it is ideal for short-range navigation.

Great circle: This course line is the shortest course between two points on the surface of the earth, like stretching a piece of string between two points on earth. Frequent bearing changes are required to navigate by this method. For long-range navigation, divide the Great Circle route into several routes, and navigate each route by Rhumb Line.

Smooth Position

When the receiving condition is unfavorable, the GPS fix may change randomly, even if the boat is at a stop in water. This change can be reduced by smoothing the raw GPS fixes. The setting range is from 0 (no smoothing) to 999 seconds. The higher the setting the more smoothed the raw data, however too high a setting slows response time. This is especially noticeable at high boat speeds. "0" is the normal setting; increase the setting if the GPS fix changes randomly.

Smooth S/C (speed/course)

During position fixing, your boat's velocity (and course) is directly measured by receiving GPS satellite signals. The raw velocity data may change randomly depending on receiving conditions and other factors. You can reduce this random variation by increasing the smoothing. Similar to latitude and longitude smoothing, the higher the speed and course smoothing the more smoothed the raw data. If the setting is too high, however, the response to speed and course change slows. The setting range is from 0 (no smoothing) to 9999 seconds.

Lat Offset, Lon Offset

If there is the error between the positions shown on your equipment and chart when docking at a pier, you can apply an offset to latitude and longitude position. Mark the own ship's position on the chart to calculate the error with latitude and longitude, then enter the values.

Disable SV (satellite)

Every GPS satellite is broadcasting abnormal satellite number(s) in its Almanac, which contains general orbital data about all GPS satellites. Using this information, the GPS receiver automatically eliminates any malfunctioning satellite from the GPS satellite schedule. However, the Almanac sometimes may not contain all of the available information. You can disable an inoperative satellite manually. Enter satellite numbers (max. three satellites) in two digits.

SV ELV (satellite elevation)

Set the minimum elevation of satellites to use to fix position.

Roll Over

Set the year when the roll over occur. The GP-39 will automatically turns off and on to reset the satellite observation.

7.4 WAAS Menu
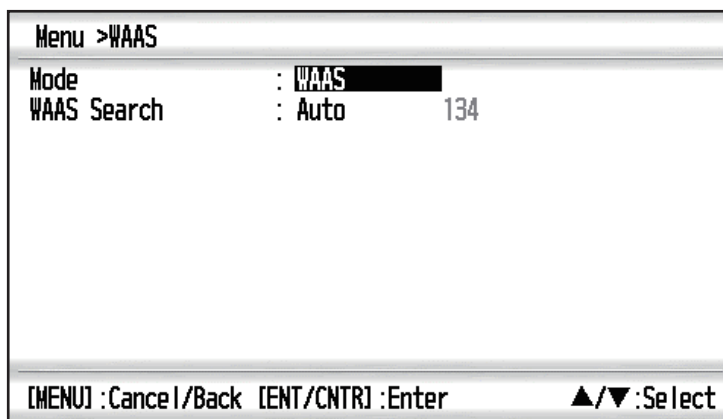

```
Menu >WAAS
Mode            : WAAS
WAAS Search     : Auto      134

[MENU]:Cancel/Back [ENT/CNTR]:Enter      ▲/▼:Select
```
*Use "0" (as default setting).

Mode

You can select [WAAS] or [GPS] for the position fixing mode. In both mode, [WAAS Search] has [Auto] or [Manual] as [WAAS Search] mode. When selecting [Auto], the mode automatically select the satellite. When selecting [Manual], you can manually select the satellite number.

WAAS Search

For WAAS setting, the GEO satellite is searched automatically or manually.
For GEO satellite number, see page AP-3.

Auto: The system automatically searches for the optimum GEO satellite from your current position. (All satellites are searched.)

Manual: Enter a GEO satellite number manually.

Correction Data Set

Use [0] as default setting.

7.5 Position Display Format

Position can be shown in latitude and longitude or TDs (Loran C). Loran C chain data is programmed into the equipment.

```
Menu >Pos/TD Setup
Display    : xx.xxx'
Loran C    : 4990:Central Pacific    11-29
△TD1       : + 0.0
△TD2       : + 0.0

[MENU]:Cancel/Back [ENT/CNTR]:Enter      ▲/▼:Select
```
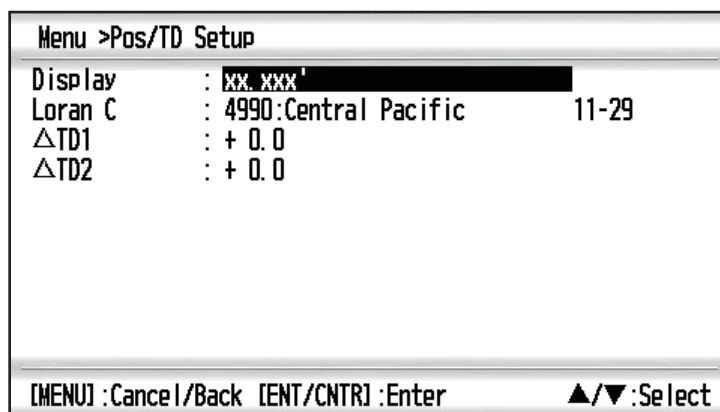

Display

Select the position format.

• xx.xxx': Shows L/L position with no seconds.

• xx'xx.x": Displays L/L position with seconds.

• LC TD: Loran C TDs

Loran C

When choosing LC TD at Display, do the following:

1) Press the **ENT/CNTR** key.

2) Select the GRI code, and press the **ENT/CNTR** key.

3) Press ▶ and **ENT/CNTR** key.

4) Select the pair of slave station, and press the **ENT/CNTR** key.

△TD1, △TD2

Enter TD offsets to refine Loran C position accuracy.

7.6   System Menu

In the System menu, you can customize various display settings, for example, time and date formats, etc.

```
Menu >System
Key Beep            : Off
Language            : English
Units               : NM, kn
Time Offset         : - 8:00
Daylight Saving Time : Off
Time Display        : 24Hour
Date Display        : DD/MMM/YY
Demo
Self Test
Reset

[MENU] :Cancel/Back  [ENT/CNTR] :Enter        ▲/▼ :Select
```
Key Beep

This item turns the key beep on or off.

Units

The Units item lets you select the unit of measurement for range, speed and distance, from the units shown below.

```
NM, kn
km, km/h
sm, mph
```
Time Offset

GPS uses UTC time. If you would rather use local time, enter the time difference (range: -14:00 to +14:00, 15 minutes step) between it and UTC time.

Daylight Saving Time

For countries that use daylight savings time, select On to enable daylight savings time.

Time Display

You can display the time in 12 or 24 hour format.

Date Display

Select the date display, DD/MMM/YY or MM/DD/YY.

Demo

The demonstration display provides simulated operation of this unit. You may set the speed manually and course manually or automatically. All controls are operative - you may enter marks, set destination, etc.

• **Mode:** Select [On]. The indication SIM appears at the top left-hand side to inform you that the simulation mode in use. To cancel, select [Off].

• **Speed:** Enter the speed (two digits) to use for the demonstration mode.

• **Course:** Select Auto or Manual. For manual entry of course, enter course in three digits. The Auto course tracks a circular course.

• **Lat, Lon:** Enter latitude and longitude of the position to start the demonstration.

Reset (Trip)

You can reset the trip meter to zero. Select [On] at [Trip] on System>Reset menu.

```
Menu >System >Reset
Trip(3.43 NM)          : Off
GPS*                   : Off
Menu Settings*         : Off
Factory Reset*         : Off

[MENU]:Cancel/Back  [ENT/CNTR]:Enter      ▲/▼:Select
```
*: Items to be cleared (See section 8.5.)

7.7   User Display Menu

To customize user displays, which are [6] and [7] appeared when the **DISP** key is pressed (see section 1.4), use the User Display menu.

	DISP key is pressed	**Item name on User Display menu**
User display 1	Display [6]	Display 1
User display 2	Display [7]	Display 2

```
Menu >User Display
Display 1      : Speedmeter     0-40  kn
Display 2      : COG

[MENU] :Cancel/Back  [ENT/CNTR] :Enter          ▲/▼:Select
```
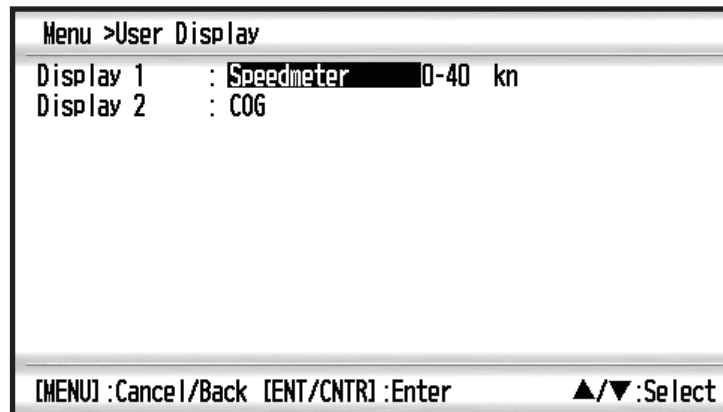

Note: You can show the User Display menu by pressing the **ENT/CNTR** key more than three seconds at the User display 1 (display [6]) and 2 ([7]).

Display 1, Display 2

You can select items to show on the User display 1 (display [6]) and 2 ([7]), from among digital data, speedometer and COG (see page 1-7). When choosing [Off] for Display 2, for example, the display [7] is not shown.

```
Digital
Speedometer
COG
Off
```
For [Digital], you can display one to four items of digital navigation data on the user display.

1. Press ▶ and **ENT/CNTR** key in order to show the following window.

2. Select the screen division, which is the number of data to display, and press the **ENT/CNTR** key.
   The display now looks something like the one shown below, showing data choices and screen division selected.

```
User Display >Display 1 >Data Select
A        : Volts
B        : SOG              ┌─────┬─────┐ *
C        : Trip             │  A  │  B  │
D        : COG              ├─────┼─────┤
                            │  C  │  D  │
                            └─────┴─────┘

[MENU] :Cancel/Back  [ENT/CNTR] :Enter        ▲/▼ :Select
```
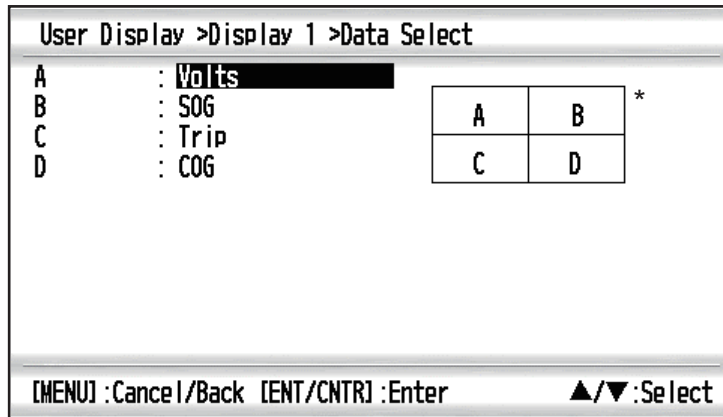

*: Depending on the selection at step 2.

3. Select [A], [B], [C] or [D], and press the **ENT/CNTR** key.

Page 1	Page 2		
ODO	Volts	ODO: Odometer distance	XTE: Cross-track error
Trip	SOG	Trip: Trip distance	TTG: Time to go
Time	COG	Time: Time	(to destination)
Date	RNG	Date: Date	ETA: Estimated time to
POSN	BRG	POSN: Position	arrival (to destination)
Volts	XTE	Volts: Power voltage	WPT: Range and bearing
SOG	TTG	SOG: Speed over ground	to waypoint
COG	ETA	COG: Course over ground	None: No display
RNG	WPT	RNG: Range	
BRG	None	BRG: Bearing	

4. Select data desired, and press the **ENT/CNTR** key.

5. Repeat steps 3 and 4 to set other data.

You can select digital data also from the User display 1 (display [6]) and 2 ([7]) directly.

1. Press the **DISP** key several times to show User display 1 or 2 desired, and press the **ENT/CNTR** key to show the cursor.

Cursor (displayed approx. seven seconds)

Volts (V)	SOG (kn)
23.9	15.8
Trip (nm)	COG M(°)
100.0	300
2. Operate the cursorpad to select the column to select data, and press the **ENT/CNTR** key.

Page 1	Page 2

BRG: Bearing

XTE: Cross-track error
TTG: Time to go
　　(to destination)
ETA: Estimated time to
　　arrival (to destination)
WPT: Range and bearing
　　to waypoint
None: No display

3. Select the item to show, and press the **ENT/CNTR** key.

4. Repeat steps 2 and 3 for other displays if necessary.

Speedometer
When choosing [speedometer], you can select the range for the speedometer to show on the User display 1 or 2.

(kn, mph)	(km/h)
0-20	0-40
0-40	0-80
0-80	0-160
7.8 I/O Setup Menu

Waypoint and route data can be uploaded or downloaded between a USB flash memory and your unit.

There are two kinds of data for route data: route data and route comment data.

```
Menu >I/O Setup
Data 1*                    : REM1
NMEA0183 Version*          : 3.0
Save WPT/RTE -> USB
Load WPT/RTE <- USB
Load WPT/RTE <- GP-32
Wiring Info. NMEA 0183

[MENU]:Cancel/Back [ENT/CNTR]:Enter      ▲/▼:Select
```
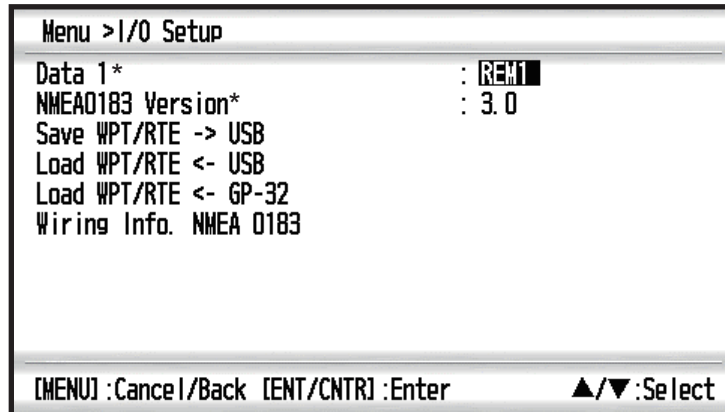

*: See chapter 9.

Note: No position fix is available during uploading or downloading.

Waypoint data format

```
$PFEC, GPwpl, llll.ll, a, yyyyy.yy, a, c—c, c, c—c, a, hhmmss, xx, xx, xxxx <CR><LF>
              1      2      3       4   5  6   7   8      9      10  11  12
```

1: Waypoint latitude

2: N/S

3: Waypoint longitude

4: E/W

5: Waypoint name (1 to 8 characters)

6: Waypoint color

(NULL/0: black, 1: red, 2: yellow, 3: green, 4: brown, 5: purple, 6: blue)

7: Waypoint mark and waypoint comment ("@_ (see below.)" + 0 to 13 characters)

-Following characters can be used for comments:
_ABCDEFGHIJKLMNOPQRSTUVWXYZ0123456789&()+-/=?> (space)

-Following marks are waypoint marks:

●: @q, ■: @r, ◆: @s, ◕: @t, ⊐: @u,

⋮: @v, ⋎: @w, ⚓: @x, ☠: @y, ⚑: @z

8: Flag marking waypoint (A: displayed, V: Not displayed)

9: UTC (Always NULL)

10: Day (Always NULL)

11: Month (Always NULL)

12: Year (Always NULL)

Route data format

$GPRTE, <u>x.x,</u> <u>x.x,</u> <u>a,</u> <u>c--c,</u> <u>c--c,</u> ... , <u>c--c</u> <CR><LF>
          1   2 3 4   5   12

1: Number of sentences required for one
   complete route data (1 to 6) See note.

2: Number of sentences currently used (1 to 6)

3: Message mode (Always set to "C".)

4: Route No. (1 to 100)

5 to 12: Waypoint name (1 to 8 characters, length of each
   waypoint name is fixed to 7 byte)
        1st byte: "-" (hyphen)= skip ON, " " (space)= skip OFF
        After 2nd byte: Waypoint name (1 to 8 characters)

Note: A route can contain max.30 waypoints and GPRTE sentence
for one route data may exceed 80 byte limitation. In this case, route
data is divided into several GPRTE sentences (max. 4 sentences).
This value shows the number of sentences route data has been divided.

Route comment data format

$PFEC, GPrtc, <u>x,</u> <u>c--c,</u> <u>c--c</u> <CR><LF>
              1   2   3

1: Route No. (1 to 100)

2: Route comment (Max. 18 characters, variable length)

3: Route name (Max. 6 characters, variable length)

End of sentence

$PFEC, GPxfr, CTL, E <CR><LF>

7.8.1 Uploading data to a USB flash memory

Note: Do not remove the USB flash memory during data upload.

1. Connect a USB flash memory to your GP-39, referring to the interconnection diagram at the back of this manual.
2. Press the **MENU** key twice to show the main menu.
3. Select [I/O Setup], and press the **ENT/CNTR** key.
4. Select [Save WPT/RTE -> USB], and press the **ENT/CNTR** key.

```
Menu >I/O Setup >Save WPT/RTE

          All WPT/RTE will be saved to USB.

                 Saving Start ?

             Yes        No

[MENU]:Cancel/Back  [ENT/CNTR]:Enter      ▲/▼:Select
```
5. Press ◄ to select [Yes], and press the **ENT/CNTR** key to start the uploading.
6. When the completion message appears, press any key to finish.

7.8.2 Downloading data from a USB flash memory

Note 1: All waypoint and route data stored in the GP-39 will be deleted when data is downloaded from USB flash memory.

Note 2: Do not remove the USB flash memory during data download.

1. Connect a USB flash memory to your GP-39, referring to the interconnection diagram at the back of this manual.
2. Press the **MENU** key twice to show the main menu.
3. Select [I/O Setup], and press the **ENT/CNTR** key.
4. Select [Load WPT/RTE <- USB], and press the **ENT/CNTR** key.

```
Menu >I/O Setup >Load WPT/RTE

Current WPT/RTE will be erased and load USB data.

                 Loading Start ?

             Yes        No

[MENU]:Cancel/Back  [ENT/CNTR]:Enter      ▲/▼:Select
```

5. Press ◄ to select [Yes], and press the **ENT/CNTR** key to start the downloading.
6. After the completion message appears, press any key to finish.

## 7.8.3 Importing data from GP-32

Waypoint and route data can be imported from GP-32 to GP-39 by connecting two GP units with serial cable.

Preparation

1. Connect the serial cables of GP-32 and GP-39 as below illustration using the signal converter.
2. Turn on the display units of GP-32 and GP-39.

Operation on GP-39

1. Press the **MENU** key to show the main menu.
2. Select [I/O Setup], and press the **ENT/CNTR** key.
3. Select [Load WPT/RTE <- USB], and press the **ENT/CNTR** key.
4. Select [Yes] and press the **ENT/CNTR** key.

```
Menu >I/O Setup >Load WPT/RTE

Current WPT/RTE will be erased and load GP-32 data.

          Loading Start ?

        Yes        No

[MENU]:Cancel/Back  [ENT/CNTR]:Enter      ▲/▼:Select
```
Note: After selecting [Yes], all waypoints and routes are erased from GP-32.

5. The below screen appears on the GP-39 display.

```
Menu >I/O Setup >Load WPT/RTE

Current WPT/RTE will be erased and load GP-32 data.

          Loading Start ?

                    WPT/RTE
                    Loading ------.

[MENU]:Cancel/Back   Cancel ?  er      ▲/▼:Select
```
Operation on GP-32

Only after the operation on GP-39 is done, proceed to operate the GP-32.

1. Press the **MENU** key to show the main menu.

2. Select [I/O Setup], and press the **ENT** key.

3. Select [Save WPT/RTE -> PC?], and press the **ENT** key to select [CONTINUE?].

```
███████    SAVE WPT/RTE    ███████

     ALL WPTS/ROUTES
    WILL BE SAVED TO PC.

    SET PC PORT TO 4800
    8 BIT, P-N, S1, XON/OFF.

        CONTINUE?
```
4. Below message pops-up. Select [YES] and press the **ENT** key.

```
    SAVING START?
    (PC READY?)

    ARE YOU SURE?
     YES   NO
```

↓

```
    WPTS & ROUTES

```

8.1   Maintenance

Regular maintenance is important to maintain performance. Check the following points to help maintain performance.

• Check that connectors on the rear panel are firmly tightened and free of rust.

• Check that the ground system is free of rust and the ground wire is tightly fastened.

• Check that battery terminals are clean and free of rust.

• Dust or dirt may be removed from the cabinet with soft cloth. Water-diluted mild detergent may be used if desired. DO NOT use chemical cleaners to clean the display unit; they may remove paint and markings.

• Wipe the LCD carefully to prevent scratching, using tissue paper and a soft cloth. To remove dirt or salt, use a damp soft cloth, wiping slowly so as to dissolve the dirt or salt. Rinse the cloth regularly so the dirt or salt will not scratch the LCD. Do not use solvents such as thinner, acetone or benzene for cleaning. Also, do not use degreaser or antifog solution, as they can strip the coating from the LCD.

Life of LCD

The life of the LCD is approximately 30,000 hours. The actual number of hours depends on ambient temperature and humidity. When the brilliance cannot be raised sufficiently, ask your dealer about replacement.

8.2 Troubleshooting

This section provides simple troubleshooting procedures which the user can follow to restore normal operation. If you cannot restore normal operation, do not attempt to check inside the unit. Any trouble should be referred to a qualified technician.

Symptom	Remedy
You cannot turn on the power.	Check that power cable is firmly fastened.
	Check for damaged power cable and connector.
	Check battery for proper voltage output.
No picture appears.	Press the ⏻ /**BRILL** key several times to adjust the brilliance.
There is no response when a key is pressed.	Turn off and on the power. If no change, ask your dealer.
Position is not fixed within 90 seconds.	Check that antenna connector is firmly fastened.
	Check the number of satellites on Satellite Monitor display. If there are two or less, check for obstructions between antenna unit and satellites.
Position is wrong.	Check that the correct geodetic chart system is selected on the GPS Setting screen.
	Enter position offset on the GPS Setting screen.
Loran C/Decca TDs do not appear.	Check Loran C/Decca chain data on the Pos/TD Setup screen.
Loran C/Decca TDs are wrong.	Enter TD offset on the Pos/TD Setup screen.
Bearing is wrong.	Check Magnetic Variation on the Plotter Setup screen.

8.3 Displaying the Message Board

When an error occurs, a message and an alarm icon appear on the screen. The message board displays the error messages (see page 6-2) shown in table below.

Messages and meanings

Message	Meaning, remedy
GPS ERROR!	Request service.
GPS NO FIX!	No GPS signal. Check antenna cable.
RAM ERROR!	Request service.
ROM ERROR!	Request service.
BACKUP ERROR!	RAM data corrupted. Try to clear backup data.

8.4 Diagnostics

The diagnostic test checks the ROM, RAM, input data, GPS core, keyboard and LCD performance. The user can do the tests to help the service technician in troubleshooting.

Note: Do not pull out or plug in the USB flash memory during [Self Test].

1. Press the **MENU** key twice to show the menu.
2. Select [System], and press the **ENT/CNTR** key.
3. Select [Self Test], and press the **ENT/CNTR** key.
4. Select [System Test], and press the **ENT/CNTR** key to start the test.
   The results are individually displayed as OK or NG (No Good). If NG appears, try the test again. If NG re-appears, contact your dealer for advice.
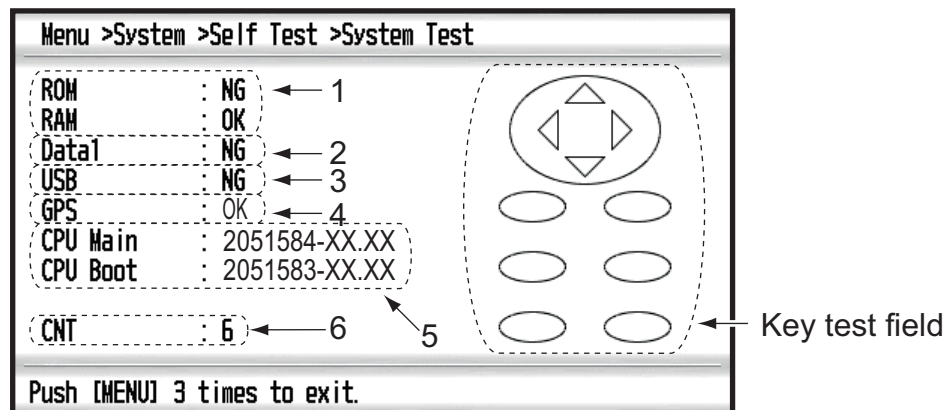

XX: Program version No.

No.	Test Items	Description
1	ROM, RAM test	Correct: "OK", Wrong: "NG"
2	Data3 test	"-" (This test is used at factory only.)

No.	Test Items	Description
3	USB	Correct: "OK", Wrong: "NG"
4	GPS test	Correct: "OK", Wrong: "NG"
5	Program version No.	The program version No. which is currently used appears.
6	CNT	Number of test repetition.

5. Press each key one by one.
    The corresponded mark on the display turns red if the key is functioning properly.

6. Press the **MENU** key three times to close the test screen.

7. Select [LCD Test], and press the **ENT/CNTR** key.
    Each press of this key changes the LCD pattern in the sequence shown below.
    Red→Green→Blue→Red (gradation)→Green (gradation)→Blue (grada-
    tion)→White→Black→White/Black (gradation)→return to System screen.
    Note: To cancel the test, press the **MENU** key.

8. Press the **MENU** key twice to close the menu.

8.5 Clearing Data

You can clear GPS data, menu settings* and all backup data* to start afresh (*ex-
cludes Language, Units and TD).

1. Press the **MENU** key twice to show the menu.

2. Select [System], and press the **ENT/CNTR** key.

3. Select [Reset], and press the **ENT/CNTR** key.

```
Menu >System >Reset
Trip(9.09 NM)      : Off
GPS                : Off
Menu Settings      : Off
Factory Reset      : Off

[MENU]:Cancel/Back [ENT/CNTR]:Enter      ▲/▼:Select
```
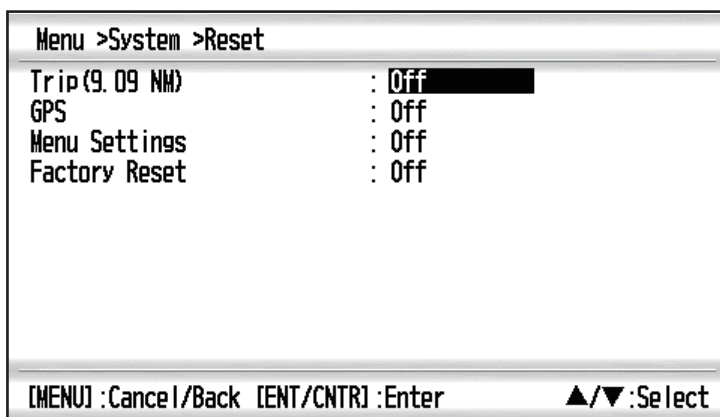

4. Select [GPS], [Menu Settings] or [Factory Reset], and press the **ENT/CNTR** key.

5. Select [On], and press the **ENT/CNTR** key.

6. Press ◄ to select [Yes], and press the **ENT/CNTR** key.
    [Menu Settings], [Factory Reset]: Go to Initial Setting screen. Select the language,
    then press **ENT/CNTR** and **MENU** key in order.

9. INSTALLATION

9.1 Equipment Lists

Standard Supply

Name	Type	Code No.	Qty	Remarks
Display unit	GP-39	000-029-443	1	
Antenna Unit	GPA-017	000-029-316	1	w/10 m cable
Spare Parts	SP20-01601	001-435-700	1	Fuse FGMB 125V 1.5A PBF
Installation Materials	CP20-03901	001-435-710	1	Self-tapping screw 5 × 16, 4 pcs.
	CP20-03900	001-435-720	1	
Accessories	FP20-01300	001-435-730	1	Plastic bag

Optional Supply

Name	Type	Code No.	Qty	Remarks
Flush Mount Kit F	OP20-45	001-435-860	1	
Flush Mount Kit S	OP20-46	001-435-870	1	
Mast Mounting Kit	CP20-01111	004-365-780	1	
Operator's Manual	OME-44940-*	001-435-850	1	

9.2 Installation of Display Unit

9.2.1 Installation consideration

The display unit can be installed on a desktop, underside of table or in a panel. Refer to the outline drawings at the end of this manual for installation instructions. When selecting a mounting location, keep in mind the following points:

- Locate the unit away from exhaust pipes and vents.

- The mounting location should be well ventilated.

- Mount the unit where shock and vibration are minimal.

- Locate the unit away from equipment which generates electromagnetic fields such as a motor or generator.

- Allow sufficient maintenance space at the sides and rear of the unit and leave sufficient slack in cables, to facilitate maintenance and service.

- Observe compass safe distances noted on SAFETY INSTRUCTIONS to prevent interference to a magnetic compass.

- Locate the unit away from direct sunlight. The LCD display may black out if it is exposed to direct sunlight for a long time.

9.2.2   Desktop mount

1. Detach the display unit from the hanger.
    Note: To detach the display unit from the hanger, align the arrow marks on the unit and hanger. If the arrows are not aligned when you detach the unit, you may damage the unit or the hanger.
2. Prepare four pilot holes (for 5×16 self-tapping screws) at the mounting location.

3. Fix the hanger to the mounting location with four self-tapping screws (5×16, supplied).

Self-tapping Screw
(5x16, 4 pcs.)

Hanger

4. Attach cables to the back of the display unit.

5. Attach the display unit to the hanger.
    Note: To attach the display unit to the hanger, align the arrow marks on the unit and hanger.

9.2.3   Flush mount

Using Flush Mount Kit F (OP20-45)

An optional flush mount kit type F is required. The table below shows the contents of the OP20-45 kit.

Name: Flush Mount Kit F, Type: OP20-45, Code No. 001-435-860

Name	Type	Code No.	Qty
Self-tapping screw	4 × 8 SUS304	000-163-797-10	4
Cosmetic panel	20-038-1201	100-406-600-10	1
Self-tapping screw	5 × 16 SUS304	000-162-607-10	4

1. Using the template (supplied), cut out a hole in the mounting location.

2. Prepare four pilot holes (for 5x16 self-tapping screws) at the mounting location.

3. Detach the display unit from the hanger.
   This hanger can be discarded.

4. Attach the flush mount kit F to the display unit using four self-tapping screws (4 × 8) to fasten the kit F to the display unit.

5. Attach the display unit and flush mount kit F to the hole made at step 1.

6. Connect cables to the back of the display unit.

7. Use four self-tapping screws to fasten the display unit to the mounting location.

Self-tapping Screw
(5 × 16, 4 pcs.)

Using Flush Mount Kit S (OP20-46)

An optional flush mount kit type S is required. The table below shows the contents of the OP20-46 kit.

Name: Flush Mount Kit F, Type: OP20-46, Code No. 001-435-780

Name	Type	Code No	Qty
Self-tapping screw	4 × 8 SUS304	000-163-797-10	4
Butterfly bolt	M4 × 35 SUS304	000-163-933-10	4
Butterfly nut	M4 SUS304	000-167-545-10	4
Flush mount metal	20-038-1101-0	100-406-570-10	2
Mount S Sponge	20-038-1102-0	100-406-580-10	1

1. Using the template (supplied), cut out a hole in the mounting location.

2. Detach the display unit from the hanger.
   This hanger can be discarded.

3. Attach the Mount S Sponge (supplied) at the back of the display unit.

4. Set the display unit into the mounting hole. Make sure that the display unit is not tilted and has a service space more than 100 mm at the back of unit.

5. Attach the flush mount metal (supplied) to the both sides of display unit using four self-tapping screws (4 × 8) to fasten the kit S to the display unit.
6. Tighten the butterfly bolts and butterfly nuts (supplied) from the back of display unit.

More than 100 mm.
(Space for service)
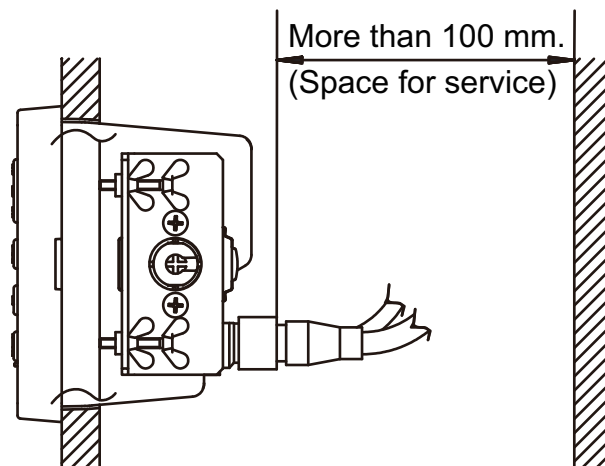

9.3   Installation of Antenna Unit

Install the antenna unit referring to the antenna installation diagram at the back of this manual. When choosing a mounting location for the antenna unit, keep in mind the following points:

• Select a location out of the radar beam. The radar beam will obstruct or prevent reception of the GPS signal.

• The location should be well away from a VHF/UHF antenna. VHF/UHF antenna emit harmonic waves which can interfere with the GPS receiver.

• There should be no interfering object within the line-of-sight to the satellites. An object within line-of-sight to satellites, for example, a mast, may block reception or prolong acquisition time.

• Mount the antenna unit as high as possible to keep it free from interfering objects and water spray. Freezing water can interrupt reception of the GPS satellite signal.

Note 1: Do not shorten the antenna cable.

Note 2: If the antenna cable is to be passed through a hole which is not large enough to pass the connector, disconnect the connector with needle nose pliers and a 3/8-inch open-end wrench. Reconnect the connector as shown below, after running the cable through the hole.
9.4   Language Setting

When you first turn the power on after installation, you are asked the language to use on the equipment. Press ▲ or ▼ to select the language, and press the **ENT/CNTR** key.
9.5　Input/Output Data

This equipment inputs/outputs NMEA0183 data shown below. Note that NMEA0183 version (1.5/2.0/3.0) can be a selected from the I/O setup screen.

NMEA0183 Input Sentence

Talker	Format	Note
GP	RTE	
PFEC, GPwp1		
PFEC, GPrtc		
PFEC, GPxfr		
PFEC, cprst		
SD	TLL	Request for Target
PFEC, SDmrk		Mark Additional information of longitude, latitude and its position.

NMEA0183 Output Sentence

Format**	REM1	REM2	AP	GPS
AAM*			ON	
APB*			ON	
BOD*			ON	
BWC*		ON	ON	
BWR*		ON	ON	
DTM	ON	ON		
GGA	ON	ON		ON
GLL	ON		ON	
GSA				ON
GSV				ON
RMB*	ON	ON		
RMC	ON	ON		
VTG	ON	ON	ON	ON
XTE			ON	
ZDA	ON	ON	ON	

Other output sentences:

REM1/REM2: Output data to radar, echo sounder and so on.

AP: Mainly output data to an autopilot.

GPS: Mainly output GPS satellite information for serviceman.

*: Not output when no waypoint is set.

**: Talker; GP

Output setting

1. Press the **MENU** key twice to show the main menu.

2. Select [I/O Setup], then press the **ENT/CNTR** key.

3. Select [Data 1] or [NMEA0183 Version] depending on the equipment connected.

4. Press the **ENT/CNTR** key. One of the following screens appears depending on the item selected at step 3.
"Data1"   "NMEA0183 Version"

5. Press ▲ or ▼ to select the option.
   [REM1], [REM2]: Output data to radar, echo sounder.
   [AP]: Output data to an autopilot.
   [GPS]: Output GPS data (used for the service)
   [1.5], [2.0], [3.0]: select the NMEA version of external equipment. If you are unsure of the version number, try both and select the one which successfully outputs data.

6. Press the **ENT/CNTR** key.

7. Press the **MENU** key twice to close the menu.

This page is intentionally left blank.

AP-2

APPENDIX 2 WHAT IS SBAS?

A satellite based augmentation system, or SBAS (Satellite Based Augmentation System), is an augmentation system that uses additional messages from satellite broadcasts to support regional and wide area augmentation. SBAS provides GPS signal corrections to SBAS users, for even better position accuracy, through the GPS error corrections that are widely broadcasted from the geostationary satellite.

SBAS is used in America, Europe, Japan and India.

- America: WAAS (Wide Area Augmentation System)
- Europe: EGNOS (Euro Geostationary Navigation Overlay Service)
- Japan: MSAS (Multi-Functional Satellite Augmentation System)
- India: GAGAN (GPS And GEO Augmented Navigation)

These four systems have interoperability. The illustration below shows the coverage area for each provider. This manual uses "SBAS" for these four providers generically.

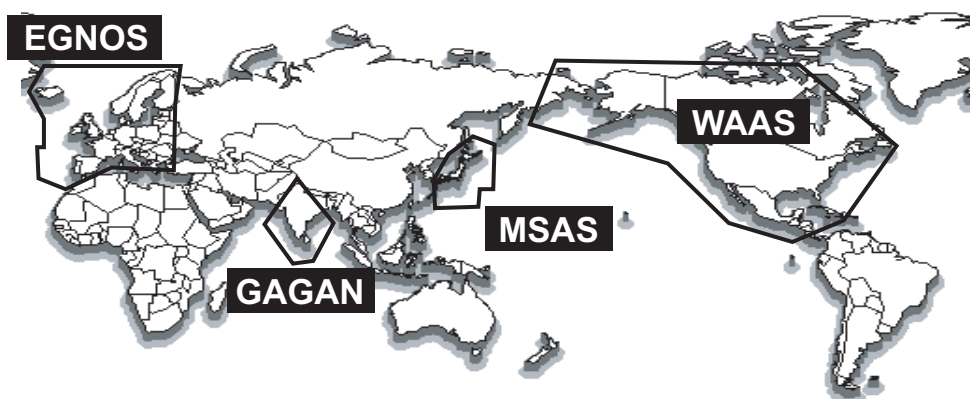

Provider	Satellite type	Longitude	Satellite No.
WAAS	Intelsat Galaxy XV	133°W	135
	TeleSat Anik F1R	107.3°W	138
	Inmarsat-4-F3	98°W	133
EGNOS	Inmarsat-3-F2/AOR-E	15.5°W	120
	Inmarsat-4-F2	25°E	126
	SES-5	5°E	136
MSAS	MTSAT-1R	140°E	129
	MTSAT-2	145°E	137
GAGAN	GSAT-8	55°E	127
	GSAT-10	83°E	128

As of March 6th, 2014

APPENDIX 3 LIST OF TERMS

The following table shows the terms used in GP-39.

Terms/Symbols	Meaning	Terms/Symbols	Meaning
● ■ ◆ 🐟 🐟 🐟 ⚓ ☠ ▷	Waypoints	Lat	Latitude
		Lon	Longitude
▲ , ▮	Own Ship	LC	Loran-C
"M"	Man Overboard	M, Mag	Magnetic
→→→	Shortest course to the destination	MAR	March
+	Cursor	MAY	May
%	Percentage	MM (MMM)	Month
2D, 3D	2D/3D GPS position fix	mph	mile per hour
W2D, W3D	2D/3D WAAS position fix	N	North
AP	Autopilot	nm	Nautical Mile
APR	April	NMEA	National Marine Electronics Association
AUG	August	NOV	November
Auto	Automatic	OCT	October
Brill	Brilliance	ODO	Odometer
BRG	Bearing	PDOP	Position Dilution Of Precision
Cmnt	Comment	Pos	Position
COG	Course Over Ground	ref.	Reference
DD	Day	QP	Quick Point
DE	Decca	REM	Remote
DEC	December	RNG	Range
Demo, SIM	Demonstration Mode	RTE, RT	Route
Disp	Display	S	South
DOP	Dilution Of Precision	s	seconds
E	East	S/C	Speed/Course
ELV	Elevation	SEP	September
ENT/CNTR	Enter	sm	Statute Mile
ETA	Estimated Time of Arrival	SOG	Speed Over Ground
FEB	February	SPD	Speed
G	Go to	T	True
GPS	Global Positioning System	TD	Time Difference
I/O	Input/Output	TTG	Time To Go
HDOP	Horizontal Dilution Of Precision	Volt	Voltage
JAN	January	W	West
JUL	July	WAAS	Wide Area Augmentation System
JUN	June	WPT, WP	Waypoint
km	kilometer	XTE	Cross Track Error
kn	knot	YY	Year

SPECIFICATIONS OF GPS RECEIVER
GP-39

1　ANTENNA UNIT

1.1	Receiving channel	
	GPS	12 channels parallel, 12 satellites tracking
	SBAS	2 channels
1.2	Rx frequency	1575.42 MHz ±1.023 MHz
1.3	Rx code	GPS: C/A code, SBAS: L1 C/A
1.4	Position fixing system	All in view, 8 state Kalman filter
1.5	Position accuracy	
	GPS	10 m (95% of the time, HDOP $\leqq$ 4)
	WAAS	3 m (95% of the time, HDOP $\leqq$ 4)
	MSAS	7 m (95% of the time, HDOP $\leqq$ 4)
1.6	Tracking velocity	1000 kn
1.7	Position fixing time	Warm start: 30 s approx, Cold start: 90 s approx.
		Hot start: 1 s approx.
1.8	Position update interval	1 s

2　DISPLAY UNIT

2.1	Display system	4.2-inch Color LCD, 480 x 272 dots, 92.88 (W) x 52.632 (H) mm
2.2	Display mode	Plotter, Highway, Steering, NAV data, Satellite monitor, User display
2.3	Brilliance	700 cd/m^2 nominal
2.4	Projection	Mercator
2.5	Range scale	
	Plotter	0.02/0.05/0.1/0.2/0.5/1/2/5/10/20/40/80/160/320 NM
	Highway	0.2/0.4/0.8/1/2/4/8/16 NM
2.6	Memory capacity	Track: 3000 pts, Waypoint: 10,000 pts w/ comment 13 character
2.7	Storage capacity	100 routes w/ 30 waypoint each
2.8	Alarms	Arrival and anchor watch, Cross track error, Ship's speed, WAAS, Time, Trip

3　INTERFACE

3.1	Number of ports	NMEA0183 V1.5/2.0/3.0: 1 port, current loop
		USB: 1 port, USB2.0
3.2	Data sentences	
	Input	RTE, TLL
	Output	AAM, APB, BOD, BWC, BWR, DTM, GGA, GLL, GSA, GSV, RMB, RMC, VTG, XTE, ZDA
3.3	Output proprietary sentences	
	PFEC	GPrst, GPrtc, GPwpl, GPxfr, SDmrk

4   POWER SUPPLY

4.1   Display unit   12-24 VDC: 0.7-0.3 A

5   ENVIRONMENTAL CONDITIONS

5.1   Ambient temperature
       Antenna unit   -25°C to +70°C (storage: -30°C to +75°C)
       Display unit   -15°C to +55°C (storage: -30°C to +75°C)
5.2   Relative humidity   93% or less at +40°C
5.3   Degree of protection
       Antenna unit   IP56
       Display unit   IP55
5.4   Vibration   IEC 60945 Ed.4

6   UNIT COLOR
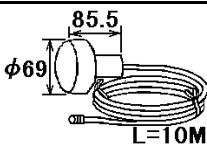

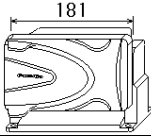

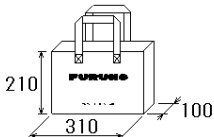

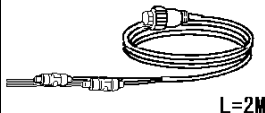

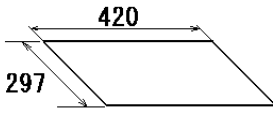

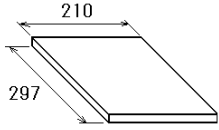

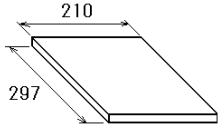

6.1   Antenna unit   N9.5
6.2   Display unit   N1.0
