*Minn Kota Terrova 87" Inch Shaft models - Puck must be mounted to a metal Deck Plate for stability. See weblink reference below.
<https://www.rhodanmarine.com/product/aluminum-mounting-plate/>

*Minn Kota Ultrerra - Padlock tab not accessible due to width of base. Other security options are available.

*Minn Kota Retrofit Users: Puck matches RTA-17 Bolt Patterns (**Puck does not match RTA-54 quick release bolt patterns**)

*Motorguide Xi5 - Must be mounted in reverse to slide on from the front due to rolled down stow guide design.

*Use Motor For Template means you will have to drill and countersink your own mounting holes in our bracket.
