

Thank you for purchasing a Shakespeare antenna product. Customer comments are welcome. Before installing, please study the diagram and check parts supplied against those listed.

IMPORTANT! Please read all instructions before installing.

The Style 4364 is a 1' (30.5 cm) extension mast for light to moderate duty applications.

Tools required: None.

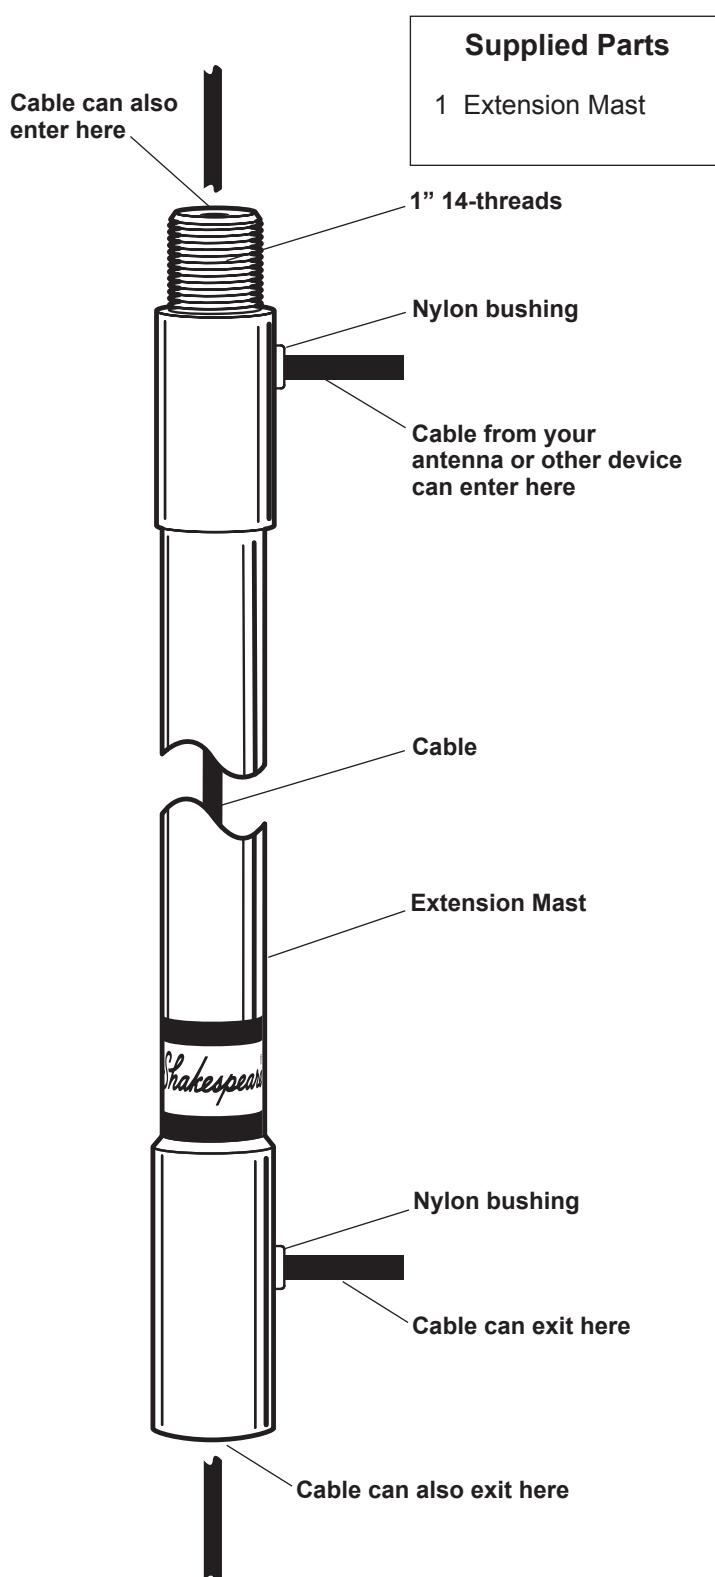

Installation Instructions

The recommended mount is Shakespeare's Style 4186 or 495 (each sold separately). Attach the extension mast to the antenna or other device before mounting the antenna.

1. Insert the cable from the antenna or other device through the Extension Mast, if required. The cable can be routed through the extension using any combination of entrance and exit points - see illustration. Be careful not to damage or strain the cable - **treat it gently!**
2. Attach the antenna or other device to the Extension Mast and hand tighten securely.
3. Attach the mast and antenna/device assembly to your mount.
4. Route the cable to your receiver or other destination, keeping it as far as possible from other electrical equipment and cables.

Cleaning Instructions

To clean the extension mast, use mild dishwashing liquid (one that is not harsh to the hands and *without* ammonia) in lukewarm water.
