

Professional Formula Rust Remover

Corrosion happens. When it does, it is not forever. Our Professional Formula rust remover is designed to eliminate rust stains and in combination with our Corrosion Inhibitor, you can set a protocol to reduce rust stains and ongoing corrosion issues.

Xanigo Marine Rust Remover is a concentrated, acid-based cleaning solution formulated to dissolve iron oxide (rust) and mineral-based corrosion from compatible surfaces. The formulation combines fast-acting acidic components with wetting and penetration agents to ensure efficient rust removal, even on heavily oxidized areas. The product is designed for professional and industrial use where controlled, effective corrosion removal is required.

RECOMMENDED USES

- Rust and corrosion removal
- Iron oxide staining elimination
- Surface preparation prior to compounding
- Industrial, automotive, marine, and maintenance applications

PERFORMANCE CHARACTERISTICS

- Rapid rust dissolution
- Effective at room temperature
- Penetrates porous corrosion layers
- Minimal residue when properly rinsed
- Controlled foaming for vertical surfaces

SAFE ON

- Bare steel and iron
- Carbon steel
- Ferrous metal components
- Gel coat
- Paint

NOT RECOMMENDED FOR

- Prolonged exposure to aluminum and stainless steel
- Anodized metals
- Natural stone (marble, limestone, travertine)
- Decorative or soft metal finishes

Always test on an inconspicuous area prior to full application.
