

PREMIUM QUALITY

HDO® PADS

Designed for long throw polishers specifically, the heavy duty orbital (HDO®) line was created to offer more durable and performance enhancing characteristics. The dual layer design allows these pads to capture all the benefits that come with not only a tapered pad, like anti-roll and backing plate protection, but the benefits of even compression like an exact fit pad. It features the benefits of a thin pad, such as increased power and reduced pad motion, while still retaining the proper weight and balance for proper rotation.

HDO® PADS AGGRESSION CHART

Each bar color coordinates with the applicable pad color.

NEW PRODUCT

New introduction is the HDO® product featuring CCS Technology™

DUAL LAYER DESIGN

Dual layers reduce heat transfer & lateral movement for less foam fatigue.

CENTER VENTILATED COOLING CHANNEL

Dissipates heat away from the center of pad, reducing temperature, increasing durability.

TAPERED EDGE

Prevents pad rolling & provides great pad rotation.
