

WAFFLE PRO PADS

IMPROVES CONTROL

Improves control and user experience.

IMPROVES CONTROL

Improves control and user experience.

PREVENTS PAD SKIPPING

Convoluted foam reduces surface friction allowing operator to run pad flat on surface.

BACKGROUND

Waffle foam pads are built to maximize performance, minimize heat, and reduce present pad skipping. The wavy waffle texture allows air flow underneath the pad to release heat. Operator control is improved by the features of our convoluted design.

WAFFLE PRO AGGRESSION CHART

Each bar color coordinates with the applicable pad color.
