

Thank you for purchasing a Shakespeare antenna product. Customer comments are welcome. Before installing, please study the diagram and check parts supplied against those listed.

IMPORTANT! Please read all instructions before installing.

The Style 5235-XT is a Galaxy® Series AM/FM antenna of 8' overall length with a 20' cable with Motorola type plug attached.

Tools required: None.

Installation Instructions

Choose a mounting location as high as feasible, as free as possible from obstructions, and as far as possible from other antennas and strong sources of RF.

The suggested mount is Shakespeare's Style 4187-HD Extra Heavy Duty Ratchet Mount (sold separately). Mount the antenna according to the directions supplied with the mount you choose.

Route the antenna's cable to your AM/FM receiver and plug the Motorola type plug into the antenna jack. Coil any excess cable in a coil of at least 8" diameter and stow it in an out-of-the-way place.

The antenna's cable can be lengthened with a Shakespeare Style 4352 AM/FM 10' Extension Cable Kit (sold separately).

To clean the antenna, use mild dishwashing liquid (one that is not harsh to the hands and *without* ammonia) in lukewarm water.

WARNING: Do not let paint solvents, cleaning solvents, or adhesive caulking come in contact with the antenna. Chemicals in these materials might destroy the finish.

Supplied Parts	
1	Antenna assembly
1	Grommet plug (see Tech Tips)

Tech Tips

This antenna will read "open circuit" when tested with an ohm meter or continuity tester.

For installations where the cable exits through the bottom center of the antenna's ferrule, replace the grommet at the exit hole in the ferrule with the supplied Grommet Plug.
