LinkPRO / LinkLITE Battery Monitors

xantrex

Battery Status At A Glance

Defining the amount of energy available in a battery is a complex task since battery age, discharge current and temperature all influence the actual battery capacity. High performance measuring circuits, along with complex software algorithms, are used to exactly determine the remaining battery capacity. A new shunt selection feature enables the Link**PRO** and Link**LITE** to measure currents up to 10,000 and 1,000 amps respectively.

The Link**PRO** and Link**LITE** selectively displays voltage, charge and discharge current, consumed amphours, remaining battery capacity and the Link**PRO** also displays the time remaining of your battery bank. Using a clear backlit LCD Display and an intuitive user interface, all parameters can be recalled with just a button press. A second battery input is also provided to monitor voltage on a second battery bank.

The Link**PRO** and Link**LITE** are equipped with an internal programmable alarm relay, to run a generator when needed or to turn off devices when the battery voltage exceeds programmable boundaries.

Performance Features

- Read your battery bank like a fuel gauge
- Provides critical information about the status of your battery bank
- Displays voltage, current, consumed amphours and remaining battery capacity
- Secondary battery bank voltage monitoring
- Auto sensing battery voltage inputs
- Large backlit LCD Display
- Quick nut mounting construction
- Programmable alarm relay
- Shunt selection capability enables flexible system integration
- Splash proof frontpanel
- 500 Amp shunt included
- CE and e-mark certified

Link**PRO** Additional Performance Features

- Displays time remaining
- Communication/expansion port
- Stores a wide range of history events in internal memory
- Advanced programmable alarm relay
- Battery temperature sensor input

Regulatory & Environmental Compliance

EMC Directive 2004/108/EC (EN61000-6-2 and -6-3). Automotive EMC Directive 95/54/EC. RoHS Directive 2002/95/EC

¹ Measured with backlight and alarm relay turned off.

 $^{\rm 2}$ Only available when optional temperature sensor is connected.

³ Depends on selected shunt. With standard delivered 500A/50mV shunt (350A continuous), the range is limited from -600 to +600A.

Note: Specifications subject to change without notice.
