

AnchorLift PRO™

By Ironwood Pacific Outdoors

We've improved our AnchorLift PRO! Here's how:

- Precision machined heavy duty aluminum body
- Super smooth ends minimize anchor line wear
- No pinch points for the anchor line
- Pulls anchors up to 80 lbs
- Lifetime Warranty
- Made in the USA

Designed & built for the most rugged applications, the AnchorLift PRO is all business. Machined from high strength aluminum, anodized for corrosion resistance, & rigged with stainless sliding hardware, it is perfect for the heavy duty user.

How does the AnchorLift PRO work?

1. Attach a buoy to the AnchorLift PRO
2. Slide the AnchorLift PRO over your anchor line, anchor as normal, and drop the AnchorLift PRO into the water
3. When you are ready to raise your anchor, simply motor forward around your anchor line to break your anchor free
4. Pull your anchor to the surface. The AnchorLift PRO sliding bolt will lock the anchor at the surface for easy retrieval
