| 2. Hazard(s) identification                                   |   |                              |             |
| Physical hazards  | Not classified.   |                              |             |
| Health hazards  | Acute toxicity, oral  |                              | Category 4  |
|   | Skin corrosion/irritation   |                              | Category 1A |
|   | Specific target organ toxicity, sir   | nale exposure                |             |
| Environmental hazards   | Not classified.   | .9                           |             |
| OSHA defined hazards  | Not classified.   |                              |             |
| Label elements  |   |                              |             |
|   |   |                              |             |
| Signal word   | Danger  |                              |             |

| Signal word                                  | Danger   |
|--|--|
| Hazard statement                             | Harmful if swallowed. Causes severe skin burns and eye damage. May cause respiratory irritation.   |
| Precautionary statement                      |  |
| Prevention                                   | Do not breathe mist or vapor. Wash thoroughly after handling. Do not eat, drink or smoke when using this product. Use only outdoors or in a well-ventilated area. Wear protective gloves/protective clothing/eye protection/face protection.   |
| Response                                     | If swallowed: Rinse mouth. Do NOT induce vomiting. If on skin (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower. If inhaled: Remove person to fresh air and keep comfortable for breathing. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a poison center/doctor. Wash contaminated clothing before reuse. |
| Storage                                      | Store in a well-ventilated place. Keep container tightly closed. Store locked up.  |
| Disposal                                     | Dispose of contents/container in accordance with local/regional/national/international regulations.  |
| Hazard(s) not otherwise<br>classified (HNOC) | None known.  |
| Supplemental information                     | None.  |
|  |  |

## 3. Composition/information on ingredients

### Mixtures

| Chemical name                              | Common name and synonyms | CAS number | %        |
|--|--------------------------|------------|----------|
| Dodecyldimethylamine Oxide                 |                          | 1643-20-5  | < 1      |
| Sodium Hydroxide                           |                          | 1310-73-2  | < 1      |
| Tetrasodium<br>Ethylenediaminetetraacetate |                          | 64-02-8    | < 1      |
| Other components below reportal            | ble levels               |            | 90 - 100 |

Other components below reportable levels

\*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

### 4. First-aid measures

| Inhalation   | Remove victim to fresh air and keep at rest in a position comfortable for breathing. Call a POISON CENTER or doctor/physician if you feel unwell.  |
|--|--|
| Skin contact   | Take off immediately all contaminated clothing. Rinse skin with water/shower. Call a physician or poison control center immediately. Chemical burns must be treated by a physician. Wash contaminated clothing before reuse.   |
| Eye contact  | Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Call a physician or poison control center immediately.  |
| Ingestion  | Call a physician or poison control center immediately. Rinse mouth. Do not induce vomiting. If vomiting occurs, keep head low so that stomach content doesn't get into the lungs.  |
| Most important<br>symptoms/effects, acute and<br>delayed                     | Burning pain and severe corrosive skin damage. Causes serious eye damage. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. May cause respiratory irritation.  |
| Indication of immediate<br>medical attention and special<br>treatment needed | Provide general supportive measures and treat symptomatically. Chemical burns: Flush with water immediately. While flushing, remove clothes which do not adhere to affected area. Call an ambulance. Continue flushing during transport to hospital. Keep victim warm. Keep victim under observation. Symptoms may be delayed. |
| General information  | If you feel unwell, seek medical advice (show the label where possible). Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Show this safety data sheet to the doctor in attendance.   |
| 5. Fire-fighting measures  |  |

| Suitable extinguishing media                                     | Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).                                   |
|--|---|
| Unsuitable extinguishing media                                   | Do not use water jet as an extinguisher, as this will spread the fire.                        |
| Specific hazards arising from the chemical                       | During fire, gases hazardous to health may be formed.   |
| Special protective equipment<br>and precautions for firefighters | Self-contained breathing apparatus and full protective clothing must be worn in case of fire. |
| Fire fighting<br>equipment/instructions                          | Move containers from fire area if you can do so without risk.                                 |
| Specific methods   | Use standard firefighting procedures and consider the hazards of other involved materials.    |
| General fire hazards   | No unusual fire or explosion hazards noted.   |

## 6. Accidental release measures

| Personal precautions,<br>protective equipment and<br>emergency procedures | Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not breathe mist or vapor. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS. |
|---|--|
| Methods and materials for<br>containment and cleaning up                  | Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Cover with plastic sheet to prevent spreading. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.   |
|   | Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.   |
| Environmental precautions   | Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS. Avoid discharge into drains, water courses or onto the ground.   |

## 7. Handling and storage Precautions for safe handling

Provide adequate ventilation. Do not breathe mist or vapor. Do not get in eyes, on skin, or on clothing. Avoid prolonged exposure. Do not taste or swallow. When using, do not eat, drink or smoke. Wear appropriate personal protective equipment. Wash hands thoroughly after handling. Observe good industrial hygiene practices.

**Conditions for safe storage, including any incompatibilities** Store locked up. Store in original tightly closed container. Store away from incompatible materials (see Section 10 of the SDS).

## 8. Exposure controls/personal protection

#### **Occupational exposure limits**

| Components                          | Туре   | Value  |  |  |
|-------------------------------------|--|--|--|--|
| Sodium Hydroxide (CAS<br>1310-73-2) | PEL  | 2 mg/m3  |  |  |
| US. ACGIH Threshold Limit           | t Values   |  |  |  |

# 10. Stability and reactivity

| Reactivity                            | Reacts violently with strong acids. This product may react with oxidizing agents. |
|---------------------------------------|---|
| Chemical stability                    | Material is stable under normal conditions.                                       |
| Possibility of hazardous<br>reactions | Hazardous polymerization does not occur.  |
| Conditions to avoid                   | Contact with incompatible materials. Do not mix with other chemicals.             |
| Incompatible materials                | Acids. Oxidizing agents.  |
| Hazardous decomposition<br>products   | No hazardous decomposition products are known.                                    |

# 11. Toxicological information

#### Information on likely routes of exposure

| Inhalation   | May cause irritation to the respiratory system. Prolonged inhalation may be harmful.  |
|--|---|
| Skin contact   | Causes severe skin burns.   |
| Eye contact  | Causes serious eye damage.  |
| Ingestion  | Causes digestive tract burns. Harmful if swallowed.   |
| Symptoms related to the physical, chemical and toxicological characteristics | Burning pain and severe corrosive skin damage. Causes serious eye damage. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. May cause respiratory irritation. |
| Information on toxicological effe  | ects  |

Acute toxicity

In high concentrations, vapors are anesthetic and may cause headache, fatigue, dizziness and central nervous system effects. Harmful if swallowed. May cause respiratory irritation.
