

LIGHTSPEED™ SALES SHEET

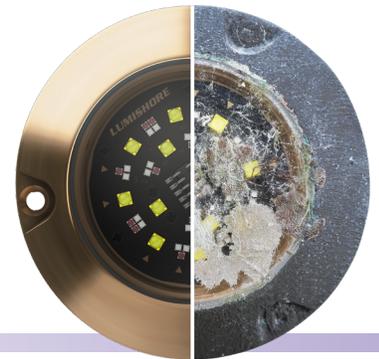

LIGHTS SHINING BRIGHTER AND FOR LONGER Lightspeed 15 ml kit

Model #LSP15K

Endorsed by Lumishore, Lightspeed™ is a transparent foul-release coating that protects underwater lights from marine growth. The light and heat generated by underwater lights create environmental conditions that favor growth, but conventional antifouling paint and common coating systems are unsuitable as they prevent light getting through. Harnessing the science behind Propspeed®, Lightspeed™ offers an eco-friendly solution to protect lights effectively, with the Propspeed® promise of proven performance.

UNDERWATER LIGHTS HAVE BECOME A HIGHLY DESIRABLE FEATURE FOR ANYONE WITH A BOAT OR A DOCK. LIGHTSPEED™ OFFERS THE BELOW KEY BENEFITS:

- Sustains lighting performance, maintaining lumen output and the intended performance of the device.
- Restores damage caused by scraping the lens while removing barnacle glue and hard growth.
- Preserves the life span of the product, protecting your customers investment.
- Reduces maintenance, mitigating the risk of damage during scheduled diver cleaning jobs.

With Lightspeed™, slime wipes away easily and hard growth can't even take hold. Just one application lasts for 12-24 months.

The 15 ml Lightspeed™ kit includes:

- 1 x Lightclean wipe
- 1 x Lightspeed™ 15 ml tube
- 1 x applicator brush

Order 8 kits and receive a free POS display box. The outer box contains 8 units.

COVERAGE GUIDE FOR UNDERWATER LIGHTS
